### EXECUTOR'S NOTICE TO CREDITORS.

In the estate of Elijah Grooms, deceased.

Notice is hereby given pursuant to Chapter 26, of the Statutes of Ontario, 1911, Section 55, and Amending Acts, that all persons having any claims or demands against the estate of Elijah Grooms, late of the Township of Richmond, in the County of Lennox and Addington, farmer, deceased, who died on or about the 18th day of March, A. D. 1913, are required to deliver or send by post prepaid to Herrington, Warner & Grange, Napanee, Ontario, solicitors for Menzo B. Grooms and Manly Jones, executors of the last will and testament of the said Elijah Grooms, deceased, on or before the 10th day of December, A. D. 1913, their christian and surnames, addresses and descriptions, with full particulars of their claims or demands duly verified, and the nature of the security (if any) held by them.

And further take notice that after the said 10th day of December, A. D. 1913, the said executors may proceed to distribute the assets of the said estate amongst the persons entitled thereto, having regard only to the claims or demands of which they shall then have received notice, and shall not be liable for the said assets, or any part thereof so distributed, to any person or persons of whose claims or demands they shall not have received notice at the time of the distribution thereof.

HERRINGTON, WARNER & GRANGE.

Solicitors for the said Executors.

Dated this 11th day of November, 1913.

Approved this 13th day of Nov., 1913.

(Sgd.) J. H. Madden, Judge, Surrogate Court, County of Lennox and Addington.

49-1

## GOOD ROADS MEETING

The Public Roads and Highways Commission, composed of Mr. C. A. McGrath, Chairman, Mr. A. H. McLean, Government Engineer, and A. Rankin, M.L.A., met in Shire Hall, Belleville, on Nov. 4th, to receive information from Township and County representatives regarding highways statute labor assessment, etc. A large number were present from the Counties of Frontenac, Lennox and Addington, Hastings, Durham and Northumberland, Prince Edward and Peterboro.

The morning session opened at 10 o'clock. The chairman, Mr. McGrath, outlined the purpose of the meeting—to gather information regarding all classes of roads.

Mr. J. W. Johnston, M.P.P., for West Hastings, expressed a cordial welcome to the commission as well as to the representatives whom he was satisfied were good road enthusiasts. The commission is what this district has been looking for. He referred to Hastings as a pattern for road building for twenty-five years. He also spoke of the good work being done by the Government in North Ontario and mentioned some first class roads in Northern New York and in Picton.

Mr. H. Grant, M.P.P., for East Hastings, made a short speech. He said that Hastings would welcome anything that would lead to the improvement of the roads.

Lieut-Col. Ponton, President of the associated boards of trade, gave an extensive address on the subject, touching nearly every advantage to be gained by a system of good roads and the great loss occasioned to the individual, to the village, town, city or county without them. The roads and bridges are the veins and arteries of the countries. He represented 65 boards of trade and at the meeting at London in February, it was moved by Belleville, seconded by Guelph, relating to the appointment of a government commission and the construction and maintenance of roads. He pointed out that Belleville Board is not only a city board but has the farmer, the fruit grower, etc., on its executive.

Senator Corby thought the federal government should have voted ten millions instead of one million to good roads. Canada would receive invaluable results by means of American visitors. He would not say a word against railways. They have always received large subsidies but he thought it time for the farmers to get fair play. He would say ten millions for roads.

Mr. W. B. Northrup, K.C., M.P., said the two most important acts last session were those dealing with pollution of rivers and streams and good roads. Something is wrong and something must be done. Life in rural places must be made more attractive. He thought the Federal government should hand the money over to be expended by the Provinces. The public works department had been doing good work in our province, the Federal government might appoint a commissioner to assist.

Mr. Vermilyea, President of the

should contribute a larger proportion for the construction of road bridges and also a like proportion maintenance.

Many of the speakers praise government for appointing the commission to deal with this most important subject.

At the conclusion of the session the chairman said on behalf of his colleagues and himself, that he did not find words to express his gratitude at the interest manifested at assistance given the commission.

A very hearty vote of thanks was tendered to the commission, who went from this county were: Warde, M. Ryan; County Clerk G. Wilson; W. Platt, H. Armstrong, E. Harrison and R. W. Longmire.

If you want perfect satisfaction that new range, wants to be perfect. M. S. Madole.

### ODESSA.

While loading milk cans on a Monday morning, Henry Atk team ran away and threw him one can, off the wagon, cut his face so that it required several days to sew it up, also breaking four ribs. The team was stopped going far, doing little damage to horses or wagon.

A. M. Parrott realized good results at his sale of thoroughbred horses and farm implements.

Mrs. S. J. Sproule and Miss returned home after a visit with Milsap's brother, Thomas, at Belleville.

The wind and rain storm did no damage in this section on Monday last, but on account of it was no services in the churches the morning service in the Methodist church.

Bath-room fixtures in great variety. Towel bars, soap dishes, sponge, everything in bath-room fixtures. BOYLE & SON.

### EMPEY HILL.

The farmers are almost tired of plowing.

No service in the church last day, quarterly service at Belleville usual.

Mr. Ross Sexsmith is taking a course in Business College, Kingston.

Mr. J. Smith is at Mr. I. B. Taylor for a few days.

Miss Eva Sils, of Picton, spent the week the guest of her cousin, Mr. Dean.

Mrs. Z. Dean returned from a visit to Toronto on Saturday last.

Mrs. I. B. Taylor who has poor health for a long time, is the sick list and under Dr. Vro care.

Miss Maybus Dean is spending the week at Bardolph attending wedding of her cousin, Miss Ina who was married on Wednesday.

A large number attended the boxing match at Napanee on Tuesday. Empey Hill carried off the two first prizes and a special prize in men's class winning first prize and the special for best outfit, a Rupert Taylor winning first prize in class.

Cut flowers fresh from Dale Estate florists. Funeral and wedding designs delivered any place you want them, at Hooper's—Napanee's Largest Drug Store.

said the two most important acts last session were those dealing with pollution of rivers and streams and good roads. Something is wrong and something must be done. Life in rural places must be made more attractive. He thought the Federal government should hand the money over to be expended by the Provinces. The public works department had been doing good work in our province, the Federal government might appoint a commissioner to assist.

Mr. Vermilyea, President of the Good Roads Association, presented the recommendation of a committee of the County Council of Hastings.

1. That legislation be passed prohibiting the manufacture of new vehicles and the renewing of old ones carrying 1500 lbs. or over, with a tire less than 4 inches wide and five years only be allowed for changing to the same width.

2. That a tax of 50c per horse power be imposed in lieu of the existing license fee upon all autos up to and including 20 horse power. 75c per horse power above 20 h.p. and up to 30 h.p. \$1.00 per horse power on all above 30 h.p., and that that the money so raised be applied to highway improvement and hereafter expenditure on county roads and bridges be borne one third by the County and two thirds by the Government of the Province.

That it is of supreme importance that the cost of maintenance should be borne in the same proportion as the cost of construction by the county and province.

That as we consider county roads should be constructed in such places only as will be in the general interest. We are opposed to frontage tax. That the highway connecting the producer with the producer's market receive first consideration and that such be selected where the council in each county shall approve Thomas H. Thompson, Warden.

As there were a great number of speakers, it will be impossible to refer to what each one said but I might just point out what seemed to be the consensus of opinion on some of the most important subjects dealt with:

The necessity of wide tires on vehicles drawing heavy loads.

That Railroad Companies should pay a much higher tax and that the money thus obtained should be used for the improvement of highways.

That autos which do so much damage to the roads should pay a large fee for the use of our roads and that the money from this source should go to road construction or maintenance.

That in road construction drainage was of first importance.

While some thought the assessment Act should be amended in some particulars, others thought the Act was alright if the assessors did their duty and that the inspectors should be appointed to see that they obey the law.

There was some difference of opinions in regard to statute labor. Perhaps a majority wish it abolished. A respectable number thought it better to commute it as the municipality would not have to strike an extra tax for roads while a very few considered it better to continue the system.

It seemed to be the general impression, although only a couple introduced the subject in their speeches, that if the autoists paid a reasonable tax and our railroad paid anywhere, nearly as much taxes as they do on the other side and the money was used in road-making, we would soon have a system of highways that we would not be ashamed of. Mr. Robert Cooke, M. P. P., for North Hastings, said that it was encouraging to see the legislature endeavouring, by the commission to find a firm basis for road building and he thought it showed that the government was ready to contribute in large amounts, towards building and maintaining roads.

Another point on which all who spoke, agreed that the Government

care. Miss Maybus Dean is spending week at Baradolph attending wedding of her cousin, Miss Ina who was married on Wednesday. A large number attended the plowing match an Napanee on the Empey Hill carried off the two first prizes and a special. Kent in men's class winning first and the special for best outfit, and Rupert Taylor winning first in class.

**Charcoal.**

Just the thing for starting fire bags for 25 cents. M. S. Madole.

### DESERONTO ROAD.

The plowing match which was in Napanee, last week on the fair Mr. Harry Hunter was fairly attended by the people from there were three contestants prizes, viz: Messrs. Scott, Hudson Aylsworth. The latter being the one winning a prize. Well done!

We understand that Mrs. R. Burrell has sold her farm to Mr. C. ton, who has already taken possession of the same. Mr. Scott, who worked the farm for the past sun has moved off.

Mr. Austin Kimmerly, milk driver for the Palace Road factory, during the past season, has made his last owing to so many dropping of making their winter butter. Also Byron Rose, who has been driver for the Deseronto Factory, finished Monday, 10th inst. The latter fact having enjoyed a most successful season.

Mr. Robert Dowling is overhauling his barn, putting a new siding otherwise adding improvements.

The hay presses are at the prime at Sam Sagers', having finished pressing at Harry Oliver's back! Hay seems to be moving up in a good way bringing top prices in Toronto and in good demand.

Sanitary hen's nests. Poultry and ground oyster shell. Gritt scrap. BOYLE & SON.

### SELBY.

Hurrah for Selby!

On Friday evening, November the Selby Epworth League int having a social evening. Come enjoy the musical and literary programme, which is being prepared by young people. Don't miss it. O. time.

The men working at the telegraph are making fine progress and we soon be able to enjoy its cheery in our homes.

We were well pleased with the interesting and helpful lectures by Rev. Buchanan, of Alberta, given Thursday afternoon and evening, ember 6th.

Don't forget that there is going to be a skating rink at Selby west, as soon as Jack Frost strikes us enough.

A number from here attended ploughing match, Mr. J. C. Hudson and Mr. John Gollinger carrying prizes.

Rev. J. P. Wilson, B. A., of Napanee, preached an orange sermon an appreciative audience last Sunday afternoon.

We are glad to welcome Messrs. Andrew and Arthur McIvor who have just arrived home, spending some time in the west.

Mr. and Mrs. W. J. Winter and Karl and Claude, spent last Sunday the guests of Mr. and Mrs. G. S. Smith.

Now, don't forget the social ever! Everybody welcome.

Visitors: Mrs. M. Wagar at M. Hart's; R. J. Gilligan spent Sunday at home; Danford Larkins at D. Frink's; Mr. and Mrs. W. A. Benn at Camden East.

### GRASS LINED BOOTS.

**They Are Worn by the Nomadic Lapps, Who Never Get Cold Feet.**

While civilized man suffers intensely from cold feet every winter, the Lap- lander, living in the far north of Eu- rope, has no such trouble. A traveler writes: "Their boots are made of rein- deer skin and are worn very large, and the toes are pointed and curve upward so as to be easily slipped into their skis. The Lapp usually fills his boots half full with a peculiar green grass, into which he thrusts his naked feet. He then packs the boots full with more grass, tucks the ends of his trousers inside and binds them tightly round with many turns of a brightly woven braid. With these precautions they never suffer from cold feet, and chil- blains, corns or such like civilized com- plaints are an unknown horror to them."

Concerning other customs the same writer says: "The Lapps are essen- tially a nomadic race and spend most of their lives wandering fancy free among the wild and glorious scenery of their northern home. However, at times no doubt the stillness of the frozen mountains becomes too still, and they turn their herds and start toward their nearest meeting place. Twice a year they hold these general gatherings—at Easter and midsummer—when they congregate and hold a general fair. It is on these occasions that they celebrate their weddings and funerals. The revelries last only about ten days, but many marriages take place between couples who perhaps have never met previously.

"As soon as a Lapp can afford to buy enough reindeer for himself he leaves the parental tent, takes a wife and roams away wherever his heart or reindeer dictates. There are no social distinctions in Lapland. Should a man have no reindeer or possibly have lost what he had he travels with a rich man and helps him tend the herd, but he lives and feeds with them in the same tent and is quite on a social equality until he can afford to start off with his own herd."—Chicago News.

## PURITY and QUALITY

These two essentials explain the great increase in demand for our bread since the installation of our new electrical bread mixer.

We have now a thoroughly up-to-date and sanitary bread plant, including bread mixer, sanitary steel troughs, etc. As a result we are able to place before the public a pure, clean wholesome, smooth-grained loaf of bread.

We ask all housewives who desire purity and quality in their bread to try a loaf of this bread and be convinced of its superiority.

## NEWS TOPICS OF WEEK

Important Events Which Have  
Occurred During the Week.

The Busy World's Happenings Carefully Compiled and Put into Handy and Attractive Shape for the Readers of Our Paper—A Solid Hour's Enjoyment.

WEDNESDAY.

Fire originating in the top room of the Oakville town hall, resulted in the destruction of the building.

The election of R. E. Truax in South Bruce will not be protested. This was decided at a meeting of conservative workers yesterday.

The general order to inoculate every member of the Colorado National Guard to render them immune to typhoid fever was put into effect yesterday.

John Renshaw, G.T.R. station agent at Blair, near Galt, for the past twenty years, committed suicide yesterday by drinking carbolic acid. No reason for the act is known.

Rt. Hon. James Bryce presided yesterday in London at luncheon given in honor of John R. Mott, chairman of the Continuation Committee of the World's Missionary Conference.

Charles Sherston of Portage la Prairie, Man., aged 27, lost his life endeavoring to rescue two of Portage's well-known citizens, who, when out duck shooting, capsized their canoe.

Wallace M. Norris, C.P.R. engineer, took a hemorrhage while taking his train from Goderich, but gamely stuck to the throttle until he arrived at Guelph, where he was relieved. He will recover.

A wealthy philosopher of Cleveland, O., William Vernon Backus, has formed the Appreciation League of the United States, and aims to promote talosaphy, the art of making happiness epidemic.

Martin Moran, a survivor of the Titanic disaster, was killed yesterday by a rush of coal at Natalie Collier, Shamokin, Pa. He had been employed as a sailor on the big liner and swam to a rescuing boat.

THURSDAY.

Supt. Sullivan of the Welland Canal has been chosen as assistant to Chief Engineer Weller of the ship canal.

Word has been received at Ottawa from Vilhjalmar Stefansson announcing that the three boats comprising the expedition have reached their winter quarters.

Col. Roosevelt arrived in Buenos Ayres yesterday morning on board the Argentinian gunboat Uruguay from Montevideo, and was given a splendid reception.

Sixteen bodies were taken during the night from the burned and splintered passenger coaches of the Marseilles-Paris express train, wrecked Tuesday near Melun, France.

Collingwood Schreiber, Deputy Minister of Railways, says he anticipates that the golden spike, marking the completion of the G.T.P., will be driven early next summer.

Ralph Desane, of Belleville, was committed for trial yesterday on a charge of inciting two small boys to enter the hallway of a city residence and steal a purse from a hall rack.

The famous English artist, Frank Brangwyn, has been commissioned to execute mural decorations for several courts in the fine arts section at the Panama Exposition in San Francisco.

Wreckers yesterday abandoned the Montreal Transportation Co. barge

The presence of bubonic plague and yellow fever on the great trade routes from the south converging upon the Panama Canal, is giving grave concern to American health officials.

Latest returns give the Newfoundland Government 29 seats in the House. The Opposition, under the leadership of the former Premier, Sir Robert Bond, has captured 14 seats.

A. S. L. Turner, who was arrested in Montreal and taken to Ottawa on a charge of bigamy, pleaded guilty yesterday, and was sent to the Central prison for one year. Both the wives were in court.

MONDAY.

Ludwig III., the new King of Bavaria, who replaces the mad King Otto, took the oath yesterday in the throne room of the palace at Munich.

About \$5,000 damage was done to the contents of the harbor board's freight shed, Toronto, by fire which broke out at 10 o'clock Sunday morning.

W. A. Borah, a wealthy merchant, was found guilty of murdering his wife and their daughter, and sentenced to life imprisonment at Atoka, Okla.

Wm. Ayres, motorman, was instantly killed and two persons injured Saturday morning, when a trolley car crashed into a grocery store at Laketown, Pa.

Winnipeg, on behalf of the sister provinces, yesterday turned out en masse to a meeting to welcome Gen. Bramwell Booth, commander-in-chief of the Salvation Army.

The last rail on the extension of the Niagara, St. Catharines & Toronto Railway, was laid Saturday, and a temporary passenger service will be commenced within two weeks.

A strong earthquake shock occurred at Messina, Sicily, last night. It was followed by two shocks of less severity. No damage was done, but the people are greatly alarmed.

A four-year-old girl, knocked down by an automobile in which Prince Friedrich Leopold of Prussia was driving at Potsdam, Germany, died after the prince had conveyed her to a hospital.

Suffragists made another demonstration at the service of St. Paul's, London, yesterday. At intervals they kept singing "God Save Annie Kenney and Sylvia Pankhurst who are being persecuted for conscience sake."

TUESDAY.

The Chino-French bank at Peking yesterday signed a contract for a loan to the Chinese Government of \$30,000,000.

Sir Richard Solomon, High Commissioner in London for the Union of South Africa, died yesterday, at the age of 63.

Frank Davison, lumber king, died at Bridgewater, N.S., after an illness of four days. He suffered a stroke of paralysis last week.

James G. Kerr, aged 40, despatcher on the G.T.R. at London, Ont., was instantly killed yesterday at Hyde Park through being struck by express No. 3.

Horace Whitten and his wife had a thrilling escape from their blazing home at Beamsville when fire broke out from an overheated furnace yesterday morning.

Four hundred young men and women endeavoring to secure positions in the civil service are undergoing examination this week in the House of Commons at Ottawa.

Snow piled up in drifts from two to five feet deep in the outlying districts of Buffalo, completely tying up suburban street car lines as a result of the heavy storm there.

The first C.P.R. train from Eastern Canada to arrive since Saturday reached Winnipeg yesterday. Eight

The famous English artist, Frank Brangwyn, has been commissioned to execute mural decorations for several courts in the fine arts section at the Panama Exposition in San Francisco.

Wreckers yesterday abandoned the Montreal Transportation Co. barge Cornwall, which sank with its cargo of 40,000 bushels of wheat in the St. Lawrence Canal while en route to Montreal.

### FRIDAY.

Advices from Chihuahua say 6,000 rebels began an attack on Chihuahua city at ten o'clock Wednesday night.

George and Clement Young, and Vivian Marple, were drowned in a small slough by falling through the ice at Invermere, B. C.

Maurice Chevallier, French aviator, yesterday imitated Pegoud, and flew over the aerodrome at Versailles in his biplane head downwards.

Lieutenant-Governor Brown opened the Saskatchewan Legislature yesterday, forecasting a measure to provide for agricultural credits.

Sidney Smith, a boy of eleven, lost his life in Edward's Lake, near South Porcupine, but rescued Mina Hogg, aged 12, who had broken through the ice.

No decision has been reached by the Dominion Government and no definite steps taken in regard to securing a site for the Canadian building in London.

The next development in aviation will be the "flying motorcycle" according to Glenn H. Curtiss, aviator, and builder of the Curtiss aeroplane and flying boat.

Dr. L. C. Prevost of Ottawa, one of Canada's leading authorities on gynaecology, died yesterday at Saranac Lake, N.Y. He had been ill for about a year with tuberculosis.

C. H. Minchin, former assistant city treasurer of Calgary and alderman, was found guilty of the theft of \$5,000 from the city and was sentenced to five years in the penitentiary.

Mrs. Anna Tasnes, 39 years old, strangled herself to death in the Beth Israel Hospital at Newark, N.J., without disturbing eleven other patients or a nurse who sat within a few feet of her.

### SATURDAY.

Four persons were killed and seven injured yesterday in Los Angeles when two automobiles collided.

Michigan Masons will buy six hundred acres on the Canadian shore of Lake Erie to make a modern Venice for Masons only.

An order-in-council has been passed, fixing the date of the election under the Scott Act in Peel, Welland and Huron counties for Nov. 24.

Gen. Felix Dix was arrested in Havana yesterday and accused of shooting Pedro Guerrero, the young Mexican wounded in Thursday night's fracas.

While the new Underwood tariff law does not mention Canadian reciprocity by name, the effect of the bill is to entirely abrogate the Taft reciprocity act.

Dr. Charles McBurney, a well-known New York surgeon, died suddenly at his home Cherry Hill, N.Y. He attended President McKinley after the Czolgosy outrage.

Roland B. Molyneux, twice tried twelve years ago for the murder of Mrs. Katherine J. Adams and acquitted, was married to Miss Margaret Connell of New York.

Six Chinamen appeared in the Halifax police court yesterday morning, charged with enticing young girls to visit their laundries for immoral purposes. They were remanded.

amination this week in the House of Commons at Ottawa.

Snow piled up in drifts from two to five feet deep in the outlying districts of Buffalo, completely tying up suburban street car lines as a result of the heavy storm there.

The first C.P.R. train from Eastern Canada to arrive since Saturday reached Winnipeg yesterday. Eight other passenger trains arrived during the course of the evening.

Between three and four thousand surgeons from all over the world registered yesterday at the opening of the fourth annual Clinical Congress of Surgeons of North America in Chicago.

All wheat has been removed from the C.P.R. elevator at Transcona, which on Oct. 18 sank twenty feet into the ground and tipped at an angle of 45 degrees. Not a bushel has been lost or spoiled.

### INCREASE GRANTED.

**Trainmen of Eastern States Get Seven Per Cent. Raise.**

NEW YORK, Nov. 11.—The long-lived controversy between railroads of the east and their conductors and trainmen over the latter's demands for more pay, ended last night. The employees are granted an increase in wages averaging seven per cent. and totalling \$6,000,000 annually—about half of what they wanted—from Oct. 1 last; effective for one year. One hundred thousand men will share in the increase. The award of the arbitration commission filed late yesterday afternoon in the Federal Court is binding and final.

Since 1909, when last an increase was granted, the arbitrators found that the cost of living had increased seven per cent.

### Niagara Level Is High.

NIAGARA FALLS, N.Y., Nov. 11.—The water in the Niagara river is thirty feet higher than the normal level. The base of the elevator in the State Park is flooded. The second of the Three Sister Islands is almost under water, and the park officials are fearful for the connecting bridges. Down in the lower gorge, near the whirlpool, the waters are laying the bank of the gorge railroad.

### Just the Reverse.

"Beating the sword into a plowshare?" inquired the tourist pleasantly as he halted at the door.

"Beating a plowshare into a sword," responded the energetic blacksmith. "I manufacture war relics."—Louisville Courier-Journal.

### Successful Opening.

### Unwedded.

Teacher (in grammar class)—What is a singular pronoun. Johnny? Johnny—One that isn't married yet.—Judge.

No, genius is not inspiration. Genius is perspiration.—Thomas Edison.

**Children Cry FOR FLETCHER'S CASTORIA**

man Halloran of London, and man Stapleton of Sarnia, were and Brakeman Ryckman, Er Hall and Fireman Holding, don, were seriously injured in lision on the Grand Trunk at stead early yesterday morning three met death when a freight ran into the caboose and engine turning to the cry "dead." accident occurred a few miles of Wyoming close to the scene disastrous wreck of some year. The crash occurred shortly five o'clock yesterday morning was the result of the storm, has been raging since Sunday, men in the caboose were asleep time. Their bodies were buried in the wreck.

A few minutes after the collision broke out in the caboose at three Sarnia men were burned death before they could be lifted.

The moans and screams of those as they lay pinioned under the beams and trucks could be heard a distance, and as the fire raged they begged piteously to be freed. One man kept calling for one to strike him over the head with an axe or something else. The bers of the crew who were felled worked frantically, but they could do nothing and were forced to helplessly watch their comrades die.

**Seized and Liberated Again**  
BROCKVILLE, Nov. 11.—Cu Officer Burns, at the request of Montreal customs, seized the barge Reliance lying at Malabar wharf, on the ground that the barge had not undergone inspection year. A. J. Lee, the contractor raising the steam barge Keys claimed that the boat had been officially inspected the day before for Brockville by a Quebec official. Apparently there was some misunderstanding in Montreal or Ottawa, after being under seizure days.

**Borden Congratulates Centennial**  
UXBRIDGE, Nov. 11.—The suggestion of Major Sharpe, Michael O'Neill, who is 105 years age, received the first letter given from the new postoffice at Uxbridge.

The letter was from Premier Borden and was one of congratulations on his coming birthday.

"He lives long that lives well time misspent is not lived, but," wrote Mr. Borden. "It is a long up these 106 steps, and it must gratifying to you to know that all that period you have enjoyed respect of those who knew you."

### Kansas City Star.

A man once arrived at Kansas with a terrible pain under his belt. "Go for a doctor," said the sufferer, "and go quickly."

"What kind of a doctor do you want?" inquired the messenger. "I have all kinds—allopath, homeo, hydropath, osteopath."

"Oh," cried the traveler in his anxiety, "any path will do! All paths lead to the grave."—Kansas City Star.

### A Mixed Quartet.

Among other curious things I heard was a quartet sung simultaneously in four languages, written by a reminiscent contributor to the York Sun. It was Clara Louise Kelllogg sang in English, Brigno Italian, a German woman in German, and a Frenchman in French. The audience never noticed the confusion of tongues.

## SECTION IS VOID.

Annul Corrupt Macdonald, Man., Contest.

W. L. P. G. Man., Nov. 11.—Chief Justice Macdonald, after a morning made an order that Alexander Morris, a candidate in Macdonald's contest, should show a majority of one hundred on Oct. 12 last if not been duly elected, and further that Andrew W. D. John E. Woods, petitioner, entitled to the general costs of the contest. The court will make to the Speaker of the Commons in four days, as required.

Proceedings of the court were of a character, counsel for the defendant, having filed an admission of the campaign his agents guilty of corrupt practices. The principal point under discussion would be the court assume from the fact in making its report of reason to believe that corrupt practices had extensively pre-

cedence which was thus upset by principally on reciprocity. L. Richardson, running as an independent candidate. Whether again contest the seat could be gained yesterday. Mr. Morris of course, eligible as a candidate.

**Bellevue Case For Trial.**  
W. A. Nov. 11.—The Bellevue case must go to trial on its merits. The Supreme Court in a judgment down yesterday afternoon holds the appeal of E. A. D. the petitioner, from the decision of Judge Bruneau, who dismissed the petition for lack of sufficient grounds.

The member is Arthur Carr, who was unseated before the election.

## GGED FOR DEATH.

men Burned In Wreckage After Collision.

ON, Ont., Nov. 11.—Conductor of Sarnia Tunnel, Brake-loran of London, and Brake-leton of Sarnia, were killed, when a fireman, Engineer, Fireman Holding of London, seriously injured in a collision of the Grand Trunk at Warden yesterday morning. The death when a freight train the caboose and engine ran to the city "dead." The

## FEAR FOR SHIP'S CREW

Twenty-Eight Men in Danger on Stranded Vessel.

Unknown Steamer Is Ashore Off Manitou Island, Lake Superior—Tomlinson Liner Is Wrecked Off Grosse Cap Point But Cannot Be Reached—Huronic Also Reported In Trouble—Caravel May Be Lost.

CALUMET, Mich., Nov. 11.—In the face of a 50-mile gale, shifting from northeast to northwest, on Lake Superior last night, fear is expressed for the safety of the crew, numbering 28 men, aboard a steamer stranded on Gull Rock, off Manitou Island, at the extreme end of Keweenaw Point. The life-saving crew at Eagle Harbor is trying to make a run for the wreck.

The life-savers, after a three hours' battle with the heavy seas, a stiff wind on shore, and a snowstorm, were baffled yesterday, principally because they were not equipped with a power boat.

The steamer was sighted Saturday afternoon by the steamer George B. Stephenson, shortly after it went on the reef. The Stephenson could see the crew aboard the craft, but could not reach the wreck, and gave up the attempt after a struggle of six hours.

According to the Stephenson, the bow of the stranded boat is high on the reef and the stern deep in water, putting out the fires under the boilers. This morning Capt. McCormick and his life-saving crew left on the tug Hebard, taking with them a power boat with which an effort will be made to reach the wreck.

Another Steamer Wrecked.

SAULT STE. MARIE, Mich., Nov. 11.—Down-bound steamers continue to arrive heavily iced from the fierce storm which is sweeping over the lakes. Nearly a hundred steamers are now scattered between the Soo and Whitefish, awaiting for weather conditions to permit them to proceed. Yesterday afternoon reports of steamers in trouble began to come in.

The Superior last evening reported a Tomlinson line steamer wrecked off Grosse Cap Point. Later, the McDougall, which reached the Soo last night, confirmed the report. The captain says he heard distress signals from the steamer yesterday afternoon. He tried to get to her, but on account of the heavy seas and strong wind had to give it up. The wreck's identity has not been clearly established, but it is thought to be either the Hartwell or the James E. Davidson. The captain of the McDougall said he was almost sure it was the Davidson. The steamer is lying dead on the waves. The crew are still on board as far as could be learned.

Another big steamer, unidentified, is reported aground on Point Iroquois last night.

Huronic Stranded?

CALUMET, Mich., Nov. 11.—According to reports which have reached here by wireless, three other steamers are stranded at different points on Lake Superior and three craft are missing. The passenger steamer Huronic of the Northern Navigation Co. is stranded on Whitefish Point, and two steamers are reported ashore at Isle Royale and Copper Harbor. The watchman at the Portage Lake United States Ship Canal reports that the steamer Simon Langell and two consort left there unbound and have not been heard

## BIG FREIGHTER IS LOST

Unknown Lake Steamer Goes Down Near Sarnia.

Possibly Over Thirty Lives Have Been Lost In the Overturning of a 600-Foot Steel Vessel Whose Hull Is Projecting From Water In Lake Huron—Crew Must Have Been Caught Like Rats In Trap.

SARNIA, Ont., Nov. 11.—Thirty or more persons, crew of a 600-foot steel freighter found bottom side up yesterday only a few miles from the mouth of the St. Clair river, in Lake Huron, directly in the path of the passing steamers, are believed to have perished in the gale which swept the great lakes on Sunday. Captains of vessels which made port here yesterday assert that the finding of the freighter is clear evidence that one of the greatest calamities in the history of Canada's inland navigation has occurred.

All Sunday night the wind blew a 60-mile gale over Lake Huron, curling the waters into huge billows that climbed high above the decks of the boats that were without shelter. When the storm died out yesterday morning the watchman in the tower of the life-saving station on the shore of Lake Huron, above the mouth of the river, reported that he could make out a dark object about 100 feet long and quite broad, floating about three miles from the shore.

Word was sent to the Sarnia office of the Reid Wrecking Co., and within a few minutes the Canadian tug, Sarnia City, was heading under full steam for the open lake. When the mouth of the river was reached the boat had to battle her way through the huge billows. When about seven miles from the river lighthouse, the low, black object was discerned, and it was soon seen that the object was 100 feet of the forward part of a big freighter's keel.

The boat was under water, with the exception of about 100 feet forward. It was thought that the upper works of the bow were holding the heavier afterpart of the boat from sinking out of sight.

When the tug arrived within a few feet of the black hulk, orders were given to stand by. Nothing, however, could be done, and as it was known that no one could be alive inside the boat, the tug returned to this port. They knew that the brave men that had died in that overturned mass of steel had gone to their death without even a fighting chance for their lives, being, in fact, caught like rats in a trap.

Upon arrival of the tug at Sarnia, enquiries were made as to the possible identity of the freighter, but nothing can be ascertained until the many boats on the lakes have reported themselves safe.

The only mark of identification is the color of the bottom of the boat, which was black. At first it was thought to be the steamer Scott, but this was dispelled when the marine reporting station reported that the Scott's hull was painted a dark red.

Captain Lampoh, one of the best known captains on the lakes, explained how he thought the accident happened. He stated that the boat was evidently proceeding up the lake light, and under those conditions could have a large amount of water in her tanks to hold her down and prevent too much jumping around. He also remarked that it was likely that

**Three Castes In Bolivia.**  
Bolivian society is composed of three strata. Firstly, we have the "gente decente," or white people who show no trace of Indian blood. This class is small, but necessarily influential; indeed, all the government of the country is in their hands. Next comes the "cholos"—those of mixed Spanish and Indian blood—and lastly the pure Indians, who form an immense submerged class—superstitious, ignorant, downtrodden, yet splendid workmen and one of the chief sources of national wealth. It is estimated that of the 3,000,000 people who comprise the Bolivian nation only about 200,000 can read and write. The great mass of

men killed at Sarnia, were killed, brakeman Ryckman, Engineer and Fireman Holding of London were seriously injured in a collision on the Grand Trunk at Waukegan yesterday morning. The met death when a freight train into the caboose and engine resulting to the city "dead." The accident occurred a few miles west of Waukegan close to the scene of the wreck of some years ago. A crash occurred shortly after 10 o'clock yesterday morning and the result of the storm, which had been raging since Sunday. The men in the caboose were asleep at the time. Their bodies were burned in the wreck.

A few minutes after the collision took place out in the caboose and the Sarnia men were burned to death before they could be liberated. The screams and screams of the men lay pinned under the heavy beams and trucks could be heard for miles, and as the fire reached they begged piteously to be killed. One man kept calling for someone to strike him over the head with a hammer or something else. The members of the crew who were following the train frantically, but they could do nothing and were forced to stand by and watch their comrades

#### Seized and Liberated Again.

ROCKVILLE, Nov. 11.—Customs officers Burns, at the request of the local customs, seized the steam tug Reliance lying at Mathen's wharf, on the ground that the boat had undergone inspection this morning. A. J. Lee, the contractor for the tug, the steam barge Keystrom, and that the boat had been inspected the day before it left Rockville by a Quebec officer. Apparently there was some misunderstanding in Montreal or Ottawa, as Reliance was released yesterday after being under seizure two

#### Men Congratulate Centenarian.

BRIDGE, Nov. 11.—Through the suggestion of Major Sharpe, M.P., Mr. O'Neill, who is 105 years of age, received the first letter given out of the new postoffice at Uxbridge. The letter was from Premier Borden and was one of congratulations on his coming birthday.

He lives long that lives well, and his spirit is not lived, but lost," Mr. Borden. "It is a long time since 106 steps, and it must be easy to you to know that during at period you have enjoyed the life of those who knew you."

#### Kansas City Star.

A man once arrived at Kansas City with a terrible pain under his belt. "I need a doctor," said the sufferer, "go quickly."

"What kind of a doctor do you want?" inquired the messenger. "We all kinds—allopath, homeopath, path, osteopath—"

"I cried the traveler in his agony, path will do! All paths lead to cure."—Kansas City Star.

#### A Mixed Quartet.

Among other curious things I have seen was a quartet sung simultaneously in four languages, writes a recent contributor to the New Sun. It was Clara Louise Kellogg sang in English, Brignoli in Italian, a German woman in German, and a Frenchman in French. The audience never noticed the confusion of

steamer Huronic of the Northern Navigation Co. is stranded on Whitefish Point, and two steamers are reported ashore at Isle Royale and Copper Harbor. The watchman at the Portage Lake United States Ship Canal reports that the steamer Simon Langell and two consorts left there up-bound and have not been heard from.

Ten boats are in shelter at the ship canal's harbor of refuge, and three more at Bete Gris. No more boats can get into the ship canal because of the heavy seas.

#### Acadian Also Aground.

ALPENA, Mich., Nov. 11.—The steamer Acadian, a steel freighter, owned by the Merchants' Mutual Line of Toronto, is hard aground on a reef in Thunder Bay, seven miles off this port. Captain Robert McIntyre and his crew are believed to be safe on board.

Although the Acadian struck the reef about four o'clock Sunday afternoon, her predicament was not discovered until late yesterday.

#### Caravel Breaks Loose.

ERIE, Pa., Nov. 11.—As one of the results of the severe wind and snowstorm which struck Erie Sunday night, the Santa Maria, a reproduction of Columbus' caravel of the same name, was torn from its moorings yesterday morning and carried on to a sandbar outside the harbor. Tugs worked all day trying to release the caravel, but gave it up last night, and it is feared it will be impossible to save her. The Santa Maria and the Pinta and Nina, sister caravels, were in winter quarters here en route to San Francisco through the Panama Canal.

#### ALLIANCE IS SECURE.

#### Rumors of Abrogation of Anglo-Japanese Pact Said To Be Groundless.

TOKIO, Nov. 11.—The suggestion that Japan intends to abrogate the alliance with Great Britain is regarded here as groundless. No question of abrogation has been raised by Japan, it is stated here, and the only moot point discussed in connection with the alliance has been that of Great Britain's attitude towards its continuance.

Chozo Koike, director of political affairs, in a speech yesterday, declared that while he resided in England as counsellor of the Japanese embassy, he had found no desire or disposition whatever to discontinue or minimize the value of the alliance. Englishmen, he said, were trying to solve the question of harmonizing the alliance with the American situation in the event of the Californian alien land ownership dispute straining relations between Japan and the United States, and also with the situation between Great Britain and colonies like Canada and Australasia, where Japanese immigrants were not welcomed.

#### To Ask Health Certificate.

ROCHESTER, N.Y., Nov. 11.—Dr. James Bishop Thomas, rector of St. Andrew's Episcopal Church, announced yesterday that in the future he would require a health certificate from persons desiring him to conduct their wedding ceremonies.

"I have had it in mind for some time to make the announcement," said Dr. Thomas, upon being asked for information on the views that led him to this decision. "I was waiting for some of the ministers to unite with me in the requirement, but none has yet seemed quite ready, so I determined not to wait any longer. I think it will be but a short time before others will take the same stand."

known captains on the lakes, explained how he thought the accident happened. He stated that the boat was evidently proceeding up the lake light, and under those conditions could have a large amount of water in her tanks to hold her down and prevent too much jumping around. He also remarked that it was likely that the boat had a large amount of water in her cargo hold to aid in steadying the boat in the big seas. He thinks that the water in the cargo hold started to roll about, with the result that the boat went completely over without any warning. Marine men are not stating what they think in regard to the name of the overturned craft, as there is a very large number of black-painted boats sailing the lakes. At the same time that the hull of the overturned boat was discovered, signals were given from the lightship on the Corsica Shoal that she was dragging her anchor and was in danger of going on the Canadian shore. The tug Sarnia City went to her assistance on orders of President Livingstone of the Lake Carriers' Association. When the tug offered to tow the craft back to her proper station, the captain refused to take the help offered, stating that he lacked official orders from the Washington authorities. The grounding of one of the steamers on the Corsica Shoal is accounted for by her captain, who blames the changed position of the lightship, which gave him a wrong direction.

#### Mutinous Sailors Under Guard.

LEWES, Del., Nov. 11.—An armed guard from the U. S. revenue cutter Onondaga was yesterday placed aboard the American four-masted bark Mangareva, the crew of the latter having mutinied on the high seas. The Mangareva sailed from Philadelphia a month ago for San Francisco with a cargo of coal. When several hundred miles at sea the crew of 28 men mutinied, locked the captain and mate in their berths and took possession of the ship. Subsequently the officers were released to navigate the ship after a promise had been extracted that the mutineers would be returned to the Delaware Capes.

#### Burned By Lamp Upsetting.

HALIFAX, N.S., Nov. 11.—Mrs. Annie Murphy, of Almon street, widow, was terribly burned yesterday morning as a result of the overturning of a lamp. With her clothing a mass of flames Mrs. Murphy rushed into the street at an early hour. Assistance was immediately available, but little could be done to relieve her sufferings, and she was taken to the hospital in a very critical condition.

#### J. W. Johnson, M.P.P., Hurt.

BELLEVEILLE, Nov. 11.—J. W. Johnson, M.P.P., of this city, yesterday morning fell upon the pavement on Front street, with the result that a small bone of the left ankle was broken.

#### London's Lord Mayor Installed.

LONDON, Nov. 11.—Sir T. Vansittart Bowater was yesterday installed Lord Mayor of the City of London with all the solemnity and display that ancient custom demands. The usual formalities having been carried out at the Guild Hall, the new Lord Mayor, accompanied by his predecessor, the sheriffs, aldermen and councillors of the City of London, went in their old-time costumes to the Law Courts, where the oath was administered by the new Lord Chief Justice, Sir Rufus Isaacs, who belongs to a family for years prominent in business and civic affairs of the city.

Indian blood, and lastly the pure Indians, who form an immense submerged class—superstitious, ignorant, down-trodden, yet splendid workmen and one of the chief sources of national wealth. It is estimated that of the 3,000,000 people who comprise the Bolivian nation only about 200,000 can read and write. The great mass of these literate people belong to the "gente decente," while the "cholo" and Indian classes are almost totally submerged in ignorance.—Christian Herald.

#### Wellington as a Shot.

"The hero of Waterloo," says Lady Frances Shelley in her "Diary," "was a very wild shot," and goes on to tell what happened once at Maresfield, where he was visiting her:

"After wounding a retriever early in the day and later on peppering the keeper's gaiters he inadvertently sprinkled the bare arms of an old woman who chanced to be washing clothes at her cottage window.

"I was attracted by her screams, and took in the situation at a glance and went to the cottage door.

"'I'm wounded, my lady!' she cried. 'My good woman,' said I, 'this ought to be the proudest moment of your life! You have had the distinction of being shot by the great duke.'"

#### Ma Was Different.

A boy wrote a composition on the subject of the Quakers, whom he described as a sect who never quarreled, never got into a fight, never clawed each other and never jawed back. The production contained a postscript in these words:

"Pa's a Quaker, but ma isn't."—St. Louis Globe-Democrat.

#### His Ambition.

"To think," said the prison visitor, "that you will have to go through life as an ex-convict!"

"Well, miss," replied Crowbar Claude, "to tell you the truth, just at present there ain't nothing I'd like more to be."—Exchange.

#### Her Only Mood.

Inquisitive Friend—Don't you find that your wife is very subject to moods? Ennepe—No; she has only one mood, the imperative, and I'm the one that's subject to that.—Judge.

## INCOMPETENCE OR WORSE

### IMMENSE WASTE OF MONEY AND WORK AT PORT NELSON.

The first big piece of work undertaken by the present government was the carrying on of the Hudson Bay Railway and Steamship route which was started by the late Liberal Government. It was a long time the fashion amongst Tories to criticize the Liberals for proceeding slowly and carefully with this vast scheme, which will involve the expenditure of many millions of dollars on a route over land and sea of which little is definitely known. Apparently now the government is being forced to realize that "Fools rush in where angels fear to tread." The stories of mismanagement and worse coming in from Port Nelson are astounding in their revelations of criminal folly.

The Borden government first selected Port Nelson for the port of the Hudson Bay terminal. The chief point in its favour appeared to be that it is on low lying ground at the mouth of the Nelson River, with shoal water extending so far that at present it is stated vessels drawing more than 14 feet of water cannot get within seven miles of the "harbour," while the silt from the river is so great that no matter how the harbour may be dredged it will constantly fill up again. Fort Churchill having deep anchorage close to shore was naturally neglected.

The government sent some 150 men to prepare this port, and then sent a number of vessels with supplies. To prove that he was a business minister, Hon. Mr. Cochrane neglected to send any means of unloading these vessels, which, although small ships, could not get anywhere near the port. One vessel loaded, at a cost of \$60,000 was compelled to bring its cargo of lumber back to North Sydney, after pitching a lot of it into Hudson's Bay, while four other vessels sent up at enormous cost had to bring their cargoes back again.

A costly dredge sent up to help clean the harbour was to have been beached

to cover up their tracks in preparation for the post-test which they know must unseat their candidate if the full facts are brought to light.

In East Middlesex the Government majority was reduced from 631 to 363 in the very heart of Ontario in a bye-election whose result was so conceded that the Liberals do not exert themselves.

In South Bruce the Conservative majority of 103 in 1911 was converted into a Liberal majority of 115, which means that 100 voters who marked their ballots for the Conservatives in 1911 have now turned their allegiance to the Liberal cause.

The net result of the three bye-elections is that 111 electors who voted for the Borden government in 1911 have now become convinced that the Liberal policy is the best for Canada, and voted accordingly.

The real result of the bye-elections is to show that the Borden government no longer represents the opinion of the people of Canada. The turn-over indicated in two typical Ontario Conservative ridings, if reflected throughout the country, as it undoubtedly is, would at a general election convert the present government majority into an immense minority.

### RECORD SYNCHRONIZERS.

#### TWO "NESTORS" OF TRAITORS MOUNT THE SADDLE TOGETHER.

Hon. Geo. E. Foster and Hon. Dr. Montague, those two veterans of the "nest of traitors," are record synchronizers. Together they plotted the overthrow of Sir Mackenzie Bowell in 1896. They synchronized in the trouble with the Independent Order of Foresters and were connected with Premier Roblin and Hon. Robert Rogers in certain land deals which did not meet with enthusiastic approval from that Order or the public. Hon. Dr. Montague continued his activities in connection with the Foresters in Australia, but his methods were not liked there and he hastened back to Canada.

This week Hon. Mr. Foster has partly realized at least the shadow of his ambitions by becoming acting Premier during the illness of Rt. Hon. Mr. Borden. Again Hon. Dr. Montague synchronizes by joining his chum Sir Rodmond Roblin as Minister of Public Works in the Manitoba government.

With Hon. Messrs. Foster and Rogers at the head of affairs in Ottawa and Sir Rodmond Roblin and Hon. Dr. Montague in control at Winnipeg, that house cleaning and moral uplift that Mr. Borden was so eloquent about in 1911 seems to be receding further than ever.

### MINISTER OF ELECTIONS ON

that reduction in tariff must benefit the consumer. Hon. W. T. White and the other ministers who are controlled by the big tariff fed interests will have hard work answering the deputation of western farmers now being formed to demand an increase of the British preference to 50% free trade with the mother country within five years, and a general tariff lowering along the lines provided for in the reciprocity pact of 1911.

### AN ARGUMENTUM AD HOMINEM.

Hon. Robert Rogers boasts that he can win elections until he has become known as the "Minister of Buy-Elections." He was particularly active in Macdonald, Richelieu and Chateaugay by-elections, where money was much in evidence, but no one ever heard the Hon. Mr. Rogers ever making a speech in any of these ridings. Hon. Mr. Rogers knows of arguments that speak louder than words, especially in elections—and election courts.

### THE TARIFF DILEMMA.

For some time after the new American tariff went into Conservative papers tried to meet the demand for free wheat and flour so as to secure free entrance for these products into U. S. markets by declaring they can get in free anyway under the provisions of the Underwood Law. A few days ago, Secretary Hamlin of the U. S. Treasury made the following ruling: "Wheat and wheat flour will not be admitted free to the U. S. from those countries which decline to admit free of duty similar products from the U. S." And the trouble is that the interests which control the Borden Government are afraid that once the Canadian people are given a taste of free foodstuffs they will redouble their support to the Liberal demand of general tariff reduction.

### How's This?

We Offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O.

We the undersigned have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.

Take Hall's Family Pills for constipation.

### PERSIAN OPIUM.

#### Turning the Poppy Juice Into Dried Cakes For Export.

Persian opium juice is sold in large copper vessels by the grower to the merchant, in whose hands it undergoes several processes in order to preserve it from fermentation and decay. On sunny, fine, hot days the Persian caravansaries, where opium dealers have their magazines, present an interesting picture. The juice is brought out to be prepared into cakes for export.

On large wooden boards, two and a half feet long and one and a half feet broad, the sticky mass is spread out with spade-like tools to permit the water it contains to evaporate. Experienced workers move from board to board, turning over the layers every now and then, that the heat and sun may dry up the exposed surfaces and render the opium fit for making into cakes. In favorable weather this process takes only an hour or so, and the opium is ready for the next manipulation.

It is now scraped off and is rolled into stiff, dough-like lumps and banded to a man who divides it into smaller portions, weighing one pound each,

## VANISHED MOUNT MAZA

It Was One of the Loftiest Pe  
the United States.

The highest mountain in Oregon, Mount Hood, 11,225 feet above the level. Compared with Mount Rainier, to the south in California, Mount Rainier, to the north in England, each rising well above the level of the sea, Mount Hood does not appear a skyscraper. However, according to the geologists of the United States, geological survey and other authorities, Oregon had at one time, before the dawn of life upon earth, a great volcano which to as far above Mount Hood as Mount Rainier, possibly even a thousand feet higher. This was great Mount Mazama. But thousands of years ago the mountain disintegrated into the bowels of the earth, all that is left today is the huge, round Crater lake.

Crater lake is the caldera of the extinct and collapsed volcano a nearly six miles in diameter. The side walls of the rim of the mountain are in places nearly a thousand feet high and almost perpendicular. The lake itself is in places 2,000 feet deep, and parts of the wall rise

any means of unloading these vessels which, although small ships, could not get anywhere near the port. One vessel loaded, at a cost of \$60,000 was compelled to bring its cargo of lumber back to North Sydney, after pitching a lot of it into Hudson's Bay, while four other vessels sent up at enormous cost had to bring their cargoes back again.

A costly dredge sent up to help clean the harbour was to have been beached on the sand for the winter. Accordingly at high tide it was run on to jagged rocks, and broke to pieces with the loss of its valuable machinery when the tide went out. So little preparation was made for taking care of the men during the Arctic winter that most of them broke their contracts and sacrificed their pay rather than face the rigours imposed upon them by the government.

The whole history of the thing is marked by waste and incompetence and every indication of this having been perpetrated for "political purposes."

The Ottawa Citizen (Cons.) discussing this says an engineer is making superhuman efforts to establish order out of chaos at Port Nelson and continues—"Beach-combers, recruited in political machine fashion are sent up as laborers only to return by the next boat. Skilled help is appointed through political pressure. Contracts for material pass through the political machine. Over all the lack of information and system, no one is responsible for anything."

This last is not correct. The government, and especially Hon. Mr. Cochrane, must be held responsible by the people. Instead of spending between \$50,000 and \$100,000 on a partisan investigation of the N.T.R., with the hope of injuring the Liberal party, it would pay the government better to do what the Liberals did with the N.T.R.—subtract politics and apply proper business methods. The captain of the "Cereanse," wrecked at Port Nelson, is practically defying the government to investigate the wreck, and expose the real conditions at Port Nelson. Some day the whole matter will be investigated and then the people will realize the cynicism of Mr. Borden's promises of clean and honest administration.

#### LESSONS ON THE BY-ELECTIONS. SHOW THAT BORDEN GOVERNMENT NO LONGER REPRESENTS THE PEOPLE.

Ample evidence is given in the result of the three bye-elections this Fall that the wave of excitement which carried the Borden government into office has spent its force. It is clear that even in Ontario, which in 1911 was the favored home of Bordenism, with calm reflection has come reaction towards Liberalism and sane government. The net result of the three bye-elections has left the parliamentary representation of the two parties unaltered, but it has left the Borden government with a considerably reduced popular vote.

In Chateaugay the government turned the Liberal majority of 40 into a Conservative plurality of 145. This victory, however, was achieved by such openly corrupt methods that ever since then the government workers have been doing everything possible

works in the Manitoba government. With Hon. Messrs. Foster and Rogers at the head of affairs in Ottawa and Sir Rodmond Roblin and Hon. Dr. Montague in control at Winnipeg, that house cleaning and moral uplift that Mr. Borden was so eloquent about in 1911 seems to be receding further than ever.

#### MINISTER OF ELECTIONS ON THE TRAIL.

The trial of the Macdonald bye-election protest is set for hearing early this month. Hon. Robert Rogers a few days ago made a hurried departure for Winnipeg. There seems to be more than coincidence in the manner in which Hon. Mr. Rogers' visits to Winnipeg synchronize with the Macdonald bye-election affair. There is, however, little chance that the trial can be further delayed by legal or illegal technicalities, much as the Roblin-Rogers coterie of election manipulators would like to do so.

#### MACHIAVELLIAN MCBRIDE.

HOW DID MR. BORDEN SO CHANGE  
HIS NAVAL VIEWS?

Sir Richard McBride at a recent Ottawa Canadian Club banquet broke all rules of decency and courtesy in order to advertise his allegiance to the Borden Naval contribution idea. Sir Richard was not ever thus, but it took him longer to turn a back somersault from the unanimous position of 1909 than such agile politicians as Premier Borden and Hon. Mr. Foster.

In a speech at Vancouver on August 9th, 1912, Premier Sir Richard McBride of British Columbia said: "Here we have the responsibility of guarding the portals of the Dominion, and we should be all the readier to show that we realize the responsibility in this regard and our readiness to act if need be. There are even now being erected or proposed costly railway terminals and big industries will follow these factories and warehouses are springing up. If we propose to secure the safety of these tremendous investments we must be sure of adequate naval strength."

The same responsibility exists to-day of guarding the Western portals of the Dominion. The same necessity for protecting the tremendous investments on the British Columbia coast exists to-day. By what species of political legerdemain did Premier Borden induce his picturesque follower from the Pacific coast to swallow his opinions and common sense in order to join the "Canada Can't" contribution crowd?

#### REVENUE DECREASES, EX- PENSES GROW.

Last month registered the greatest falling off of customs revenues that has been experienced in Canada for many years, when the collections dropped by \$972,911. Hon. Dr. Reid intimates that should this condition continue the next budget will show a falling off in revenue of 1912. With expenditures increasing as fast as the ministers can get the figures together, Hon. Mr. White had better get ready for another loan making trip to England.

#### U. S. TARIFF BENEFITS CON- SUMERS.

As a result of the new American tariff a large New York firm advertises—"Generally speaking it (the tariff) will be good for everybody. The initial benefit will be that it will enable us to offer at lower prices than has been possible hitherto, the finest and richest imported fabrics."

Despite Tory sophisries it is plain

**Shiloh**  
The family remedy for Coughs and Colds.  
Small dose. Small bottle. Best since 1876.

may dry up the exposed surfaces and render the opium fit for making into cakes. In favorable weather this process takes only an hour or so, and the opium is ready for the next manipulation.

It is now scraped off and is rolled into stiff, dough-like lumps and handed to a man who divides it into smaller portions, weighing one pound each, which he passes on to molders, by whom they are pressed into the wooden forms and then laid on a large board for the final drying process. When this is completed the cakes are rolled up in red paper imported specially from China. One hundred and forty-four are put in tin lined wooden cases are covered with strong hides and sacking. Two cases form a mule load.—Christian Herald.

#### BUSHY TAILED RATS.

They Will Steal Anything Bright That  
They Can Carry Away.

In the west and north as far as Hudson bay a species of rat is found that has a tail like the squirrel and is known as the bushy tailed rat, although more familiarly as the pack rat because of the curious trait it has of packing off with everything it can get hold of and carry. One reads a great many things regarding the intelligence of rats, but from all accounts these pack rats seem to be the cleverest of the race.

Trappers and campers out tell innumerable stories about them. They will steal knives, forks, spoons, anything, in fact, that is bright and portable, and will carry the stolen articles to their nests to play with or take them somewhere and leave them in place of other articles they steal. Dr. Merriam, the naturalist, was told a story by a hunter which illustrated this odd fancy of the pack rat.

The hunter had gone to sleep, leaving a knife sticking in a log. He was awakened in the night by a noise which he discovered by the light of the campfire was made by a couple of pack rats sitting on the log in which the hunter had left the knife. The knife was gone and the rats were trying to put a stick about a foot long in its place. They were making an effort to get the stick to stand up in the crack, but not having the skill to insert it properly it fell repeatedly, making the odd sound which had disturbed and awakened the owner of the knife.—New York Sun.

#### By Their Ribs You May Know Them.

Umbrellas sometimes speak louder than words. The traveling Englishman had become so cosmopolitan that the umbrella mender could not tell his customer was English until he opened the umbrella. Then he said:

"English, I suppose? Anyhow, your umbrella is. Umbrellas have a distinct nationality, especially American and English umbrellas. By their ribs you may know them. American umbrellas are best provided with those supports. If intended for a lady an American umbrella has nine ribs, if for a gentleman ten or even twelve, as against eight ribs in English umbrellas for either sex. Even this number represents a big cut in the anatomy of an American umbrella, which formerly contained twelve or fifteen ribs for a woman and as high as twenty for a gentleman."—New York Sun.

all that is left today is the huge crater around Crater lake.

Crater lake is the caldera of a extinct and collapsed volcano nearly six miles in diameter. The side walls of the rim of the mountain are in places nearly 1000 feet high and almost perpendicular. The lake itself is in places 200 feet deep, and parts of the wall rise from its water another 2,000 feet. The elevation of the mountain in faring as a basis the angles of the slopes, which still remain, show the apex could not have been more than 15,000 feet in height, so that Mazama was one of the most majestic peaks in the United States. United States Geological Survey.

#### MARKS ON THE BAGGAGE.

They Tell Waiters Abroad the  
Man the Owner Is.

Much traveled persons who carefully examine their trunks will find on a number of cabalistic marks they probably put down to the and tear imposed on the baggage, a matter of fact, the signs con of chance. They are placed th the waiters at the various whereat the traveler has stayed have a direct meaning.

A sort of freemasonry exists among waiters at European hotels. They have a system of marking baggage to tell other waiters the man man that the traveler is as r tipping.

The traveler who arrives at a hotel with his baggage marked with a straight upright line on either side the locks is sure of good attention. He is classified as "very liberal." A horizontal straight mark in the right hand corner of a trunk indicates that the owner is no good at all. If this mark is accompanied by a mark it signifies to the waiters that the traveler is the entirely hopeless.

A cross mark on the lower hand corner conveys the intell that the owner of the trunk is eccentric, but worth paying attention to. A diagonal mark in the lower hand corner speaks of a person who is eccentric without being liberal. don Answers.

#### ARMORER'S TOOLS.

Fine Relics of Ancient Times In  
York's Art Museum.

Very few people are aware that the heart of modern New York is a complete armorer's shop, writes Suverkrop in the American Mac. It is in the basement of the Metropolitan Museum of Art and is equipped with a complete outfit of over 60 armorer's tools. Many of these are old, having descended from man to man or from father to son through many generations. Their workmanship is excellent. Where steel has been welded to iron both welds are clean and perfect, and the junction of iron and steel is distinguishable only by the difference in color of the two metals.

The tempering of the steel seems to be good and uniform, and there are no cracks nor dents are apparent. A cursory glance at these tools would once apprise us of the origin of our modern sheet metal work implements. The working faces of the tools are highly polished, so

## WISHED MOUNT MAZAMA.

as One of the Loftiest Peaks in the United States.

highest mountain in Oregon is Mount Hood, 11,225 feet above the sea. Compared with Mount Whitney to the south in California, and Mount Rainier, to the north in Washington, each rising well above 14,000 feet, Mount Hood does not appear as a scraper. However, according to geologists of the United States geological survey and other authorities, Oregon had at one time, probably before the dawn of life upon the earth, a great volcano which towered far above Mount Hood as does Mount Rainier, possibly even several miles higher. This was the Mount Mazama. But thousands of years ago the mountain disappeared into the bowels of the earth, and what is left today is the huge rim of Crater lake.

Crater lake is the caldera of this extinct and collapsed volcano and is six miles in diameter. The inner walls of the rim of the ancient mountain are in places nearly 4,000 feet high and almost perpendicular. In places 2,000 feet and parts of the wall rise above

they do not "grip" the metal being worked, which it is free to "slide" to the shape desired by the armorer.

Every collection of ancient armor requires technical care for its upkeep. The objects must be kept free from rust, occasionally remounted, and from time to time restorations must be made to preserve these priceless specimens. In order to carry out this work the museum has arranged the shop referred to so that these necessary operations may be carried on. The armorer's tools once belonged to Daniel Tachaux, but are now the property of the museum. Mr. Tachaux brought them to this country when he came from Paris in 1909 to make some repairs in the museum's collection of armor. The outfit consists of over 600 tools and includes nearly 100 kinds of stakes and a great variety of hammers, swages, etc.

## RECESSION OF GLACIERS.

Northern Ice Fields That Once Met the Sea Are Now Inland.

Some attention is being directed to the fact that the Muir glacier is disintegrating along its face, and there is some speculation as to how long it will continue to present a great attraction

## EARLY RAILROADS

in the Days When Making a Record Was Quite an Event.

### FIRST MILE A MINUTE TRAIN.

This Honor Was Claimed by Two Roads, the Boston and Maine, With the Locomotive Antelope, and the Mohawk and Hudson, With the Davy Crockett.

The first achievements of American railroading are, in the greater number of cases, lost in the obscurity of tradition, and there has sprung up a host of interesting stories that go the rounds like Homeric tales. The honor of having created a record or a custom that is now commonplace has had many claimants in nearly every instance.

Take the first train to run a mile a minute. The Antelope, an engine on the Boston and Maine railroad, according to one of the most cherished of these legends, pulled the first train that made this record. Her run was between Boston and Lawrence, a distance of twenty-six miles, and one day in 1848 she is said to have made her last fourteen miles in thirteen minutes.

But it is just as earnestly upheld that the Davy Crockett of the Mohawk and Hudson railroad has this distinction. The Davy Crockett was the pride of the road in her day. It is said that her engineer, David Matthew, loved her better than he did his family. But she reached the pinnacle of her fame locally when in 1832, sixteen years before the Antelope was heard of, according to this other story, she covered a fourteen mile straightaway level stretch between Albany and Schenectady in thirteen minutes and made one stop for water besides. A letter written by Matthew in that year mentions having done better than a mile a minute with her on several occasions.

Running an engine at a mile a minute in those days was many times more dangerous than it is now. Three-quarters of a century ago the rails were light strips of iron spiked down to all sorts of ties. There were no tie or fish plates then, and in hot weather especially the sleepers and the rails would warp in the torrid sun and pull apart.

Not infrequently the ends of the light rails would curve upward from the track, forming the much dreaded "snake heads" which were the horror of engineers and passengers alike. Many tales are told of "snake heads" springing up under the jolting train, piercing the flimsy car floors and impaling passengers in their seats. Until a remedy was found for these "snake heads" by using better fastenings and more seasoned ties a large force of men was continually employed to walk the tracks and nail them down.

Broken car wheels were another ever present danger in those remote days. The present standard gauge is said to have been originally established by taking the distance between the

## GIRL SUFFERED TERRIBLY

At Regular Intervals—Says Lydia E. Pinkham's Vegetable Compound completely cured her.

Adrian, Texas.—"I take pleasure in adding my testimonial to the great list and hope that it will be of interest to suffering women. For four years I suffered untold agonies at regular intervals. Such pains and cramps, severe chills and sickness at stomach, then finally hemorrhages until I would be nearly blind. I had five doctors and none of them could do more than relieve me for a time.

"I saw your advertisement in a paper and decided to try Lydia E. Pinkham's Vegetable Compound. I took seven boxes of it and used two bottles of the Sanative Wash, and I am completely cured of my trouble. When I began taking the Compound I only weighed ninety-six pounds and now I weigh one hundred and twenty-six pounds. If anyone wishes to address me in person I will cheerfully answer all letters, as I cannot speak too highly of the Pinkham remedies."—Miss JESSIE MARSH, Adrian, Texas.

Hundreds of such letters expressing gratitude for the good Lydia E. Pinkham's Vegetable Compound has accomplished are constantly being received, proving the reliability of this grand old remedy. If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

## MOTIONS OF PLANTS.

Some Forms of Vegetable Life Have the Power of Choice.

One of the chief distinctions between vegetable and animal life is that animals have power of choice and of voluntary motion, while vegetables and plants grow only mechanically by natural law. But the microscope seems to show that many vegetable forms can move as easily as can animals.

There is a plant called Volvox globator, so minute that millions of it could be put in a wineglass, which is seen to whirl like a top across the field of the microscope. Some plants found in our ponds, which are still more minute, move habitually, as with an apparent purpose.

Darwin, who gave closer study than any other naturalist to climbing plants, stated that these seemed to exercise the liberty of choice. Their tendrils, in climbing over pieces of wood with holes, will try one hole after another until they find one that pleases them. He saw one tendril withdraw itself after having located itself in a hole for thirty-six hours.

Other plants will run a long way over the ground, refusing to climb the

is left today is the huge rim and Crater lake. Crater lake is the caldera of this extinct and collapsed volcano and is six miles in diameter. The walls of the rim of the ancient crater are in places nearly 4,000 feet high and almost perpendicular. Crater lake itself is in places 2,000 feet deep, and parts of the wall rise above water another 2,000 feet. A section of the mountain in fancy, as is a basis the angles of the lower slopes, which still remain, shows that the apex could not have been far from 10,000 feet in height, so that Mount Mazama was one of the most lofty and majestic peaks in the United States.—United States Geological Survey.

## MARKS ON THE BAGGAGE.

Tell Waiters Abroad the Kind of Man the Owner Is.

Each traveled persons who carefully examine their trunks will find there number of cabalistic marks which probably put down to the wear and tear imposed on the baggage. After a fact, the signs come, not chance. They are placed there by waiters at the various hotels to eat the traveler has stayed and a direct meaning.

A sort of freemasonry exists among waiters at European hotels. They have a system of marking baggage so that they can tell the manner of the traveler is as regards his habits.

A traveler who arrives at a hotel with his baggage marked with a right upright line on either side of the trunk is sure of good attention. A diagonal mark is classified as "very liberal." A horizontal straight mark in the upper hand corner of a trunk means the owner is no good at all, while a V mark is accompanied by a V signifies to the waiting frayed that the traveler is the limit—hopeless.

A cross mark on the lower right corner conveys the intelligence that the owner of the trunk is rather rich, but worth paying attention to. A diagonal mark in the lower left corner speaks of a person who is rich without being liberal.—London Answers.

## ARMORER'S TOOLS.

Relics of Ancient Times in New York's Art Museum.

Seven people are aware that in the heart of modern New York is a relic of the armorer's shop. Writes E. A. Krop in the American Machinist, in the basement of the Metropolitan Museum of Art and is equipped with a complete outfit of over 600 armorers' tools. Many of these are very old, having descended from master to son or from father to son through generations. Their workmanship is excellent. Where steel faces have been welded to iron bodies they are clean and perfect, and the difference of iron and steel is distinguishable only by the difference in lustre of the two metals.

The tempering of the steel faces to be good and uniform, as no cracks nor dents are apparent. A glance at these tools will at once apprise us of the origin of many of the modern sheet metal workers' tools. The working faces of all the tools are highly polished, so that

## RECESSION OF GLACIERS.

Northern Ice Fields That Once Met the Sea Are Now Inland.

Some attention is being directed to the fact that the Muir glacier is disintegrating along its face, and there is some speculation as to how long it will continue to present a great attraction to tourists. No one can answer this, of course, for the causes of the unusual movement are not known. Neither is it known with any certainty for how long a time this great ice mass has presented his appearance, which made it famous.

Assuming that the earliest charts of the coast are correct—and there is every reason to suppose they are—there have been very remarkable recessions of glaciers along the Atlantic coast during the last century, so that ice fields that formerly came down to the sea are now a considerable distance from it. As we understand, the earlier charts do not indicate the position of Muir glacier, so there are no means of telling if it has receded.

The cause of the recession of glaciers is not fully understood, but it seems to imply an average amelioration of the climate. Glaciers are fed from snow fields, and if they become smaller only one of two explanations seems possible. Either the snowfall in the higher levels must have diminished or the temperature in the lower levels has grown higher. There are several reasons for supposing that the climate of the north Pacific zone is becoming gradually warmer, although the change is very gradual. Sir Charles Lyell, the famous geologist, in one of his books speaks of the breaking away of a great ice barrier near Greenland, which occurred, if we are not mistaken, in 1846, and says it was one of the most significant events in the modern history of the world.—Victoria Colonist.

### Both Sides of It.

Johnny—What does it mean to say "seeing the humorous side of things," dad? Father—Well, let us take an example. How many sides has a banana skin, for instance? Johnny—Two. Father—Exactly. And when some other man steps on the banana skin he sees the serious side of it, and you see the humorous side.—London Answers.

### Ingenious.

"Now," said Mrs. Goodart, "if you do a little work for me, I'll give you a good meal after awhile."

"Say, lady," replied Hungry Hawkes, "you'll git off cheaper if yer gimme de meal now. Work always gives me a fierce appetite."—Exchange.

Looking down on others is not the way to make them look up to ourselves.

a remedy was found for these "snake heads" by using better fastenings and more seasoned ties a large force of men was continually employed to walk the tracks and nail them down.

Broken car wheels were another ever present danger in those remote days. The present standard gauge is said to have been originally established by taking the distance between the wheels of the carts used on English highways. For the same reason, apparently, the first rolling stock was equipped not with solid wheels, but with cast iron models of the wooden wagon wheel, though of smaller diameter. These were not submitted to the drop test that is now universal and were of a dangerously light pattern. The result was that often interior defects in the casting would pass unnoticed until the wheel broke and the train was derailed. It took a bad accident, in which a number of people were killed, so runs the tradition, to bring about the testing of car wheels by tapping them.

Real time saving in running trains did not begin until 1851. Charles Minot, superintendent of the Erie railroad, was one of those given credit for inaugurating telegraph signals for the handling of trains.

He was in the cab of a passenger train one day, so the story goes. There were no double track railroads in those days, and trains had to lie out on sidings and wait for the train bound in the opposite direction to come along. However long the delay, the train on the siding waited.

On this particular occasion Minot's train took its siding. The operator at the little country station strolled over, remarking that the train in the opposite direction had got stalled on the grade some fifty miles down the line and that it would be two or three hours before she could patch up her leaky flues and get power enough to climb the hill.

Minot was in a hurry, and he decided to telegraph down the line that the train he was on would not wait at the siding, but would proceed—for station agents to watch out for the other train and have it wait on the siding nearest the spot where they would meet. The engineer refused point blank to take any such risk, saying that it was against all railroad law and custom. Minot finally discharged him, put him off the engine and ran the train himself to the end of the division, keeping posted by telegraph at each station. Everything worked out just as he had planned and was so satisfactory that he at once inaugurated a system of moving all trains on telegraph signals.—Thaddeus S. Dayton in Chicago Record-Herald.

Within oneself must be the source of strength, the basis of consolation.—Marcus Aurelius.

## Dr. Morse's Indian Root Pills

are made according to a formula in use nearly a century ago among the Indians, and learned from them by Dr. Morse. Though repeated attempts have been made, by physicians and chemists, it has been found impossible to improve the formula or the pills. Dr. Morse's Indian Root Pills are a household remedy throughout the world for Constipation and all Kidney and Liver troubles. They act promptly and effectively, and

Cleanse the System

stated that these seemed to exercise the liberty of choice. Their tendrils, in climbing over pieces of wood with holes, will try one hole after another until they find one that pleases them. One saw one tendril withdraw itself from a hole having located itself in a hole for thirty-six hours.

Other plants will run a long way over the ground, refusing to climb the trees in their path until they come to a peculiar species of tree, to which they at once cling.—Harper's Weekly.

### Misuse of the Dictionary.

Since the time of Johnson the dictionaries have attempted to record the pronunciations prevalent among the best speakers of English in their generation. That they should dictate pronunciation was, of course, as ridiculous as it would have been futile. But, as in the case of Caesar, the honor of dictators seems to have been thrust upon them. Those who found themselves wallowing in the slough of despond because of conflicting pronunciations appealed to the dictionary as their arbiter and protector, and for their future safety exalted it to the position of a despot. Thus, while nobody searches the dictionary to avoid those words which it stigmatizes as slang, the pronunciation fiend is continually devouring its pages lest he commit the unpardonable sin of uttering a syllable not sanctioned by its authority.—Robert J. Menner in the Atlantic Monthly.

### The Deaf and Dumb.

In early times it was an opinion, maintained even by philosophers, that the education of the deaf and dumb was impossible. It was then believed that language could be acquired only through the medium of the ear, as shown by the couplet of Lucretius: To instruct the deaf no art could ever reach, No care improve them and no wisdom teach.

The first mention of instruction for the deaf and dumb is found in Bede, A. D. 865. No other case is met with for some centuries. Rudolph Agricola of Heidelberg makes mention of an educated deaf mute in his "Dialectica," 1480. It was not until 1620 that instruction for the deaf and dumb began to be general.—New York American.

### A Pond on the Farm.

Why not build a good pond on the farm? The government will stock it with fish; it will furnish water for your stock the year round by installing pipes and hydrants to keep the water cool and sanitary, and when winter comes it will furnish a fine place for the amusement of the young folks. Then it will supply the material for the ice crop to store away for summer use.—Successful Farming.

### Giving Her a Job.

Mrs. Strongmind—Our society has appointed me chairman of a committee whose object is to try to bring about a reduction in rents. Strongmind—I'm glad to hear it, my dear. You can begin at once on my trousers.—London Tit-Bits.

### How Did She Know?

Aunt—I don't like to see you dangle about with mere boys all the time. What do you find so entertaining in that smooth faced young Thorpe? Niece—Why, aunt, his face isn't so smooth as it looks!—Boston Transcript.

## Art in Pianos

Appearance should not be THE essential of a piano. It should be AN essential.

The New Scale Williams are masterpieces of architectural beauty. They are ornaments to every home. They lend an elegance, a refinement, that nothing else can fill. They are made in all woods and colors to harmonize with the drawing-room, parlor, den and hall.

The veneers for the New Scale Williams Pianos are of every fine kind of wood—principally MAHOGANY from Spain, Brazil and the West Indies—WALNUT, from France and the Circassus—QUARTERED OAK AND SATINWOODS from the southlands.

There are four veneers on the case—two inside and two outside. They are cross banded—that is, the grain of each veneer runs in a different direction from the one next to it—thus adding strength.

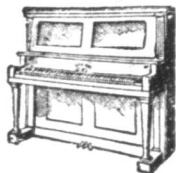

The case of the

## The New Scale Williams Piano

is made of five thicknesses of hardwood. All woods used in the New Scale Williams—in case as well as action—are seasoned for three years after reaching Oshawa. Then they are perfectly dry—can never swell or shrink—and wear like iron.

Every New Scale Williams receives seven coats of varnish. Each is allowed to sink in the wood and dry, before the next is put on. This gives the brilliant, lasting finish that is so admired. The sympathetic touch—the magnificent tone—the sweetness and volume of the New Scale Williams are fully in keeping with its exquisite appearance.

These features and many others are illustrated and described in our Booklets. May we send the three? FREE, of course. We will tell you about our Easy Payment Plan, too.

## THE NAPANEE MARBLE & GRANITE WORKS

We take this opportunity to inform you that we keep on hand a choice stock of

Not always enviable was the lot of the old time jurymen, for there was always the prospect of trouble if the verdict did not gratify the higher powers. Thus the failure of a jury to convict Sir Nicholas Throckmorton made Queen Mary "ill for three days," and she came out of her sick chamber to fine the disobedient jury (meanwhile confined in prison) the sum of \$10,000 a head.

Elizabeth followed the same plan, and the practice of fining English juries did not cease until 1670, when a fine inflicted by the notorious Jeffreys was rescinded on appeal.

In some old time "courts of quarter sessions" the injunction to lay their heads together had to be carried out by jurymen in literal fashion. When they began to consider the verdict they were supposed to dive beneath the level of the jury box and remain in that cramped position until a decision was reached.

Meanwhile the court usher stood near the box armed with a long wand of willow. If any jurymen ventured to emerge above the surface before the twelve minds were agreed down came the wand on the head of the offender.

### Home Buttermaking.

Market reports invariably creamery butter higher than butter which is the designation to that which is made on the farm. It is unfortunate that circumstances make it impracticable for dairy farmers to patronize a creamery. When this can be done, not only the profits, as a rule, increase much hard work is taken away from the overburdened members of the family. There is no good reason why butter made in the home dairy should not be as fine as that made in the creamery where cream produced all manner of conditions has been made up. All that is necessary is carrying out of a well established system in feeding the cows, care for the milk and cream and the buttering and putting up of the butter. order to teach the proper method of carrying out these various operations there has been prepared, under the direction of the Dairy and Storage Commissioner at Ottawa, a bulletin entitled "Buttermaking the Farm," written by Mr. G. Barr, Chief of the Dairy Division. This work may be secured free from the publications Branch of the Department of Agriculture, explains common defects of dairy butter as well as the conditions that are necessary to produce fine flavoured butter. It then deals with churning, washing, salting working and packing and considers the modern necessary utensils and their care. These are shown in clear illustrations. The bulletin, which is number 17 of the Dairy and Cold Storage series, includes with the following recommendations:—"Keep good cows, feed liberally, keep them comfortable, clean when in the stable, skim cream and keep it cool, churning temperature that will give a granule in the butter, use clean water for washing butter not than three degrees colder or warmer than the buttermilk. Put the butter up in neat, clean, attractive packages and keep everything in and about dairy clean and attractive."

### Bulbs for Planting.

Hyacinths, Chinese Lilies, Narcissus, fresh from the import at the Medical Hall—Fred. L. H.

### Reading His Fortune.

A negro, having won a dollar in a crap game, decided to spend it on having his fortune told. The fortune teller led him into a gloomy room, hung with dirty hangings and misty red light. She took his palm, traced it with a dollar, spread out her cards and said:

"You are very fond of music like chicken; you have won more craps, and you have been in jail."

The negro looked at her with big eyes and finally ejaculated:

"Mah goodness, lady—why, you read mah inmost thoughts!"

# RICHMOND MINUTES.

Selby, November 3rd, 1913.

The Council met at Selby.

The members present were: Messrs. Alfred McCutcheon, Reeve, and Messrs. Fred Sexsmith, Walter Russell, E. R. Sills and James Windover, vice presiding.

The minutes of the last meeting were read and confirmed.

Moved by Fred Sexsmith, seconded by E. R. Sills, that we grant the nt Valley Telephone Co., of Richmond, the right to erect a telephone in the 3rd concession of Richmond and that a By-law be passed ingly. Carried.

Moved by Fred Sexsmith, seconded by W. Russell, that the clerk o the communication of G. R. Rogers, Inspector of Public Asylums, tify him that the Township of Richmond objects to being charged with intenance of W. J. Dunn. Carried.

Moved by Walter Russel, seconded by E. R. Sills, that Fred Sexsmith ointed to have a culvert built across creek on side road between lots 15 in concession 4. Carried.

Moved by Fred Sexsmith, seconded by E. R. Sills, that the Reeve and illor Windover be a committee to attend the board of railway comers with regard to deviation road crossing C.P.R. on lot 11, concession rried.

Moved by James Windover, seconded by E. R. Sills, that the follow- counts be paid: E. T. Anderson, \$2.10 for supplies furnished N. I.; John Mowers, \$3.40 for work on bridge in road division No. 16; D. Kim, \$2.50 for work on crusher; Edward Milling for building in road n No. 16; W. G. Jenkins, \$5.00 for 50 loads of gravel for road division y order of the pathmaster; D. M. Kimmerly, \$2.60 for 26 loads of furnished road division No. 77 by order of the pathmaster; Wilson a, \$8.60 for 86 loads of gravel furnished road division No. 86; Allan a, \$20.00 for 200 loads gravel furnished road divisions 1, 2, 3, and 8 by of the several pathmasters of the said road divisions; H. Aylsworth, or work on road division No. 1; Dafoe and Waller, \$28.00 for supplies ed for roads; Joy & Son, \$5.25 for tile furnished for culvert in 7th con- ; Mrs. Mowers, \$6.00 aid for November; Frank Perry, \$2.00 for wood n crusher; Frank Perry, \$4.00 for stones used on road; Harry Oliver, or building culvert on road in road division No. 2. Carried.

Moved and seconded that this Council adjourn to meet on the first y in December at the hour of 10 o'clock a.m. Carried.

itation Cows.

our dairy cows making good ? It is necessary to find out, he famous National Dairy show Chicago the last week in Oct-

the authorities had gathered monstration cows to prove for ng how easy it is to lose good feeding poor cows. All feed ighed, all the milk was weighed ted, the results of each day acarded in bold figures above aw. These two furnish the es for one day. A 7 year oldersey consuming 21 cents worth produced only 13 cents worth

This means that she incurred f 8 cents for that day, that the st of one pound of fat was 52 hat the feed cost of 100 lbs. of vas \$2.53, and that for every worth of feed given to her she only 62 cents worth of product. o her was a 7 year old grade ey that on the same day con- only 26 cents worth of feed; ice what she did with it. She ed two and a quarter pounds of th 79 cents showing therefrom f 33 cents. Her pound of fat der 11 cents to produce, whileollar's worth of feed gave three worth of product. It has monstrated to Canadian farm- and over again that similar ons exist in each province, soon as the keeping of dairy s general, the profits from cows may be expected to in- rapidly. The Dairy Division, t, gladly supplies feed record

## THE SOUTHERN CROSS.

Its Name Does Not Quite Fit This Wondrous Constellation.

The Southern Cross, wonderful alike to those living in the southern half of the world and to the tourist thereto, is one of the most conspicuous and interesting of all the southern configura-

Situated at a distance of about thirty degrees from the south pole, it is plainly visible in all regions south of the equator, and also to some distance north, about as far as the tropic of Cancer. The farther south one travels the higher in the heavens will appear the cross, and naturally the more conspicuous it becomes.

It seems to have received its name, not like the northern constellations from the ancients, but, like most of the southern configurations from the Portuguese navigators, during their explorations into the southern waters. It is said that when Dante came out from "Inferno" he declared that he had seen a mighty cross set in the southern firmament, and the navigators set about to find such a figure and settled upon this one as best fulfilling the conditions. That it is difficult, at first glance, to picture this as a true cross, is not surprising, for had it been named the "kite," a much closer representation could have been imagined. The so called "false cross," midway between the cross and the bright star Canopus, although composed of fainter stars, is much more regular and symmetrical in shape.

Taken all in all, this constellation of the Southern Cross, which has been the wonder of centuries, still holds its place as a remarkable curiosity, even with the advance of astronomical investigation, and with the data obtained from the spectroscope and the photograph, our efforts still find unlimited problems yet to be solved. And above all others, that of the Southern Cross is yet far from a complete solu-

## WINNING CHRIST LOOSING ALL ELSE

The Prize of All Eternity God Is Now Offering.

What Winni... Christ Means—It Signifies More Than a Reformation of Life and a Pursuit of Righteousness—More Than Merely Believing In Jesus as Our Saviour—Preceded by a Consecration of F to God.

PASTOR RUSSELL

Brooklyn, N. Y., November 9.—Pastor Russell gave two addresses here to-day. We report one, from the text, "Yea, doubtless, I count all things but loss for the excellency of the knowledge of Christ Jesus my Lord, . . . that I may win Christ."—Philippians 3:8. The Pastor said that even saintly Christians seem but imperfectly to grasp the New Testament teachings respecting membership in the Body of Christ. Some assume that it is to be had on a basis of favoritism, and trust to be of the Elect. Others vaguely hope that they belong to the right Church and will attain whatever the others get. Errors of the Dark Ages absorbed in childhood have been responsible for these vagaries and for our general neglect of proper Bible study.

Conversion Not Winning Christ.

What is ordinarily termed conversion is not what St. Paul refers to as "winning Christ." Conversion signifies "a turning about." It implies a change from a wrong course to the right one. The wrong course is the sinful one, which brings injury and injustice on others. Conversion is merely the operation of a sane mind in turning about from things recognized to be injurious.

Many are converted without real knowledge of Christ's Gospel. They merely knew that they were going in the wrong direction, and turned about to take the proper course. Only strong characters can successfully pursue a right course, and these are in the minority. Whether strong or weak characters, great aid will be experienced from a knowledge of Christ's work and teachings. Nothing else gives such fortitude as the Gospel hope.

"Present Your Bodies"—Sacrifices.

The Pastor then showed how one might reform his life, have knowledge of the future life secured by Jesus' death and of the fact that we reap what we sow, and yet not be a Christian, in the Bible sense of the term. Reformatory steps are necessary, however, before anything further can be attained.

Next the speaker discussed Christianity from the Bible standpoint. The Scriptures assure us that a Christian is a New Creature—not only a civilized person. To such, "old things have passed away; all things have become new." Old ambitions and prospects, however honorable and good, give place to new ones. This is what the Apostle had in mind in our text.

What Winning Christ Means.

The Pastor then briefly outlined the Gospel, an appreciation of which is necessary to the understanding of our text. The Divine Plan for human

## THE MARKETS

CHICAGO, Nov. 10.—Assertions that hot winds had injured the Argentine crop as much as fifteen per cent, carried the wheat market today to a higher level. The close, altho easy, was  $\frac{1}{2}$  to  $\frac{3}{4}$  above Saturday night's figures. Corn finished  $\frac{1}{4}$  to  $\frac{1}{2}$  to  $\frac{3}{4}$  and oats  $\frac{1}{4}$  to  $\frac{1}{2}$  off. In provisions, the outcome was a net advance of  $\frac{1}{4}$  to  $\frac{1}{2}$  to  $\frac{3}{4}$  to  $\frac{1}{2}$  higher; Live-pork wheat closed  $\frac{1}{4}$  to  $\frac{1}{2}$  higher; corn,  $\frac{1}{4}$  lower.

### WINNIPEG GRAIN MARKET.

WINNIPEG, Nov. 10.—The wheat market opened strong on higher Liverpool cables, bearish reports from India and reduced estimates from Argentina, owing to continued drought. Cash demand for all grades of wheat was good except No. 1 northern. Oats and flax were in fair demand at unchanged prices. Cash—Wheat—No. 1 northern, 82 1/2¢; No. 2 do., 81 1/2¢; No. 3 do., 79 1/2¢; No. 4, 74 1/2¢; No. 1 rejected seeds, 78 1/2¢; No. 2 do., 76 1/2¢; No. 7 red winter, 82 1/2¢; No. 3 do., 79 1/2¢.

Oats—No. 2 C.W., 34 1/2¢; No. 3 C.W., 33 1/2¢; extra No. 1 feed, 33 1/2¢; No. 1 feed, 30 1/2¢. Barley—No. 3, 43 1/2¢; No. 4, 40 1/2¢; rejected, 38¢; feed, 35¢. Flax—No. 1 N.W.C., 11 1/2¢; No. 2 C.W., 11 1/2¢; No. 3 C.W., 9 1/2¢.

### DULUTH GRAIN MARKET.

DULUTH, Nov. 10.—Close—Wheat—No. 1 hard, 86¢; No. 1 northern, 85¢; No. 2 do., 81 1/2¢ to 81 1/4¢; No. 1 Montana hard, 82 1/2¢.

## CATTLE MARKETS

### UNION STOCK YARDS.

TORONTO, Nov. 10.—Receipts of live stock at the Union Yards were 197 cars, comprising 3838 cattle, 1512 hogs, 2201 sheep and lambs and 286 calves.

#### Exporters.

A few very choice steers of export quality and weights, bought for local killing, sold at \$7.50 to \$8 per cwt., but only live steers at latter price.

#### Butchers.

Choice picked butchers sold at \$7 to \$7.50; good, \$6.50 to \$7; medium, \$6 to \$6.40; common, \$5 to \$5.75; inferior, light butchers' halves, \$4.50 to \$5; choice cows, \$5.75 to \$6.50; good cows, \$5.25 to \$5.50; medium cows, \$4.50 to \$5; canners and cutters, \$3.25 to \$4.25; export bulls, \$6 to \$6.75; good butcher bulls, \$5.25 to \$5.75; bologna bull, \$4.25 to \$4.75.

#### Stockers and Feeders.

Choice feeders were in demand at from \$6.30 to \$6.60; good feeders, \$6 to \$6.25; choice stockers, \$5.50 to \$6; medium stockers, \$5 to \$5.50; common, rough eastern stockers, \$4.50 to \$4.75.

#### Milkers and Springers.

The market for good to choice milkers and forward springers was unchanged, being fully as strong as last week's prices, ranging from \$50 to \$100 each. The bulk of sales were at between \$55 and \$85 each.

#### Veal Calves.

The calf market was firm at unchanged quotations. Choice veals sold at \$9 to \$10; good calves, \$8 to \$9; medium, \$7 to \$7.50; common calves, \$5.50 to \$6.50.

#### Sheep and Lambs.

There was a steady, active trade in sheep and lambs at firm prices. Ewes sold from \$4.25 to \$5.40; culls and rams, \$2.50 to \$4; lambs sold from \$7.40 to \$7.65, with bucks culled out at 75c per head less.

#### Hogs.

Hogs were fully 30c per cwt. lower. Selects, fed and watered, sold at \$5.60.

### MONTREAL LIVE STOCK.

MONTREAL, Nov. 10.—At the Montreal stock yards, west end market, receipts of live stock for the week ended Nov. 8 were 3700 cattle, 2550 sheep and lambs, 2100 hogs and 1000 calves. The

cents to produce, while dollar's worth of feed gave three's worth of product. It has demonstrated to Canadian farmers and over again that similar conditions exist in each province. As soon as the keeping of dairies general, the profits from cows may be expected to increase rapidly. The Dairy Division, a, gladly supplies feed record and a herd record book; apply to-day, and make sure, by letter records, that each cow in herd makes a good profit on her work.

## Image Sale September 14th and 15th.

### Buttermaking.

Every reporter invariably quote every butter higher than dairy which is the designation given to which is made on the farm. Unfortunately that circumstances make it impracticable for farmers to patronize a creamery. This can be done, not only as profits, as a rule, increased, but hard work is taken away from overburdened members of the . There is no good reason why made in the home dairy should be as fine as that made in a factory where cream produced under better conditions has to be shipped. All that is necessary is the use of a well established system in feeding the cows, carrying milk and cream and the churning and putting up of the butter. In teaching the proper method of carrying out these various operations has been prepared, under the sanction of the Dairy and Cold Storage Commissioner at Ottawa, a pamphlet entitled "Buttermaking on the Farm," written by Mr. Geo. H. Chief of the Dairy Division. This work may be secured free from the Publications Branch of the Department of Agriculture, explains the defects of dairy butter as to the conditions that are necessary to produce fine flavoured cream. It deals with churning, washing, working and packing butter, considers the modern necessary standards and their care. These are shown in clear illustrations. This pamphlet, which is number 17 of the Dairy and Cold Storage series, comes with the following recommendation:—"Keep good cows, feed them well, keep them comfortable and when in the stable, skim a rich cream and keep it cool, churn at a temperature that will give a flaky butter in the butter, use clean, pure cream, wash butter not more than three degrees colder or warmer than buttermilk. Put the butter in clean, attractive packages, wrap everything in and about the butter in clean and attractive."

### or Planting.

Ornamentals, Chinese Lilies, Tulips, and Muscades, fresh from the importers. Medical Hall—Fred. L. Hooper.

### Reading His Fortune.

A gro, having won a dollar at a time, decided to spend it on having his fortune told. The fortune teller led him into a gloomy room with hangings and misty red lights. He took his palm, traced it with a spread out her cards and then

"You are very fond of music; you are lucky; you have won money at cards and you have been in jail." The negro looked at her with bulging eyes and finally ejaculated:

"Goodness, lady—why, yo' jest mah inmost thoughts!"—V. V.

The Southern Cross, which has been the wonder of centuries, still holds its place as a remarkable curiosity, even with the advance of astronomical investigation, and with the data obtained from the spectroscope and the photograph, our efforts still find unlimited problems yet to be solved. And above all others, that of the Southern Cross is yet far from a complete solution.—Leon Campbell in "Peru Today."

## TURKISH VENGEANCE.

It's a Perilous Matter to Endanger the Life of a Sultan.

Within two weeks after the assassination of Mahmud Shekfat Pasha, the grand vizier of Turkey, thirty-two men were put to death for taking part in the conspiracy. According to Turkish custom handed down from the time of Mohammed, there is no limit as to the number of lives that may be taken as a penalty for the murder of one man. Even those interested in the remotest degree are liable to the sultan's vengeance. It is not so much the number the ruler of Turkey is authorized to put out of the way, but rather where the line is to be drawn.

The Turks have a story of one of the earlier successors of Mohammed whose life was only endangered because of a rock falling down a declivity near which the sultan was riding with his retinue. Half a dozen of those in charge of the trip were put to death as an ordinary matter of course, then half a dozen more who might have remotely known something about the facilities afforded by the road for killing the sultan. Finally all the members of a secret club or lodge were ordered executed because it was ascertained that one of the responses to a password was "Will you roll down the stone?"

Despite the protestations of the club members that the words had no significance at all with respect to the sultan or the sultan's trip along the road, they were ordered to the scaffold. They numbered 118 in all and died bravely, assuring their executioners to the very last that they were innocent. Later a eunuch who told how the falling of the rock was merely an accident was also put to death for daring to say so.—New York Sun.

### Killed by Light.

Those who have studied the strange inhabitants of the Mammoth cave in Kentucky say that the celebrated blind fish from that cavern when placed in illuminated aquaria seek out the darkest places, and it is believed that light is directly fatal to them, for they soon die if kept in a brightly lighted tank. The avoidance of light seems to be a general characteristic of the sightless creatures dwelling in the great cave.

### Starting Something.

"While you are in asking papa for my hand in marriage, Philip, I'll be playing something lively on the piano," said the sweet young thing.

"No, I wouldn't do that, Jessica," replied the young man. "You know some people can't keep their feet still when they hear lively music."—Yonkers Statesman.

Wallace's Drug Store agents for Vinolia Toilet preparations, Huffman's Remedies, Parisian Sage, Rheuma, Neilson's and Willard's Chocoblates, Kodaks.

things have become new." Old ambitions and prospects, however honorable and good, give place to new ones. This is what the Apostle had in mind in our text.

### What Winning Christ Means.

The Pastor then briefly outlined the Gospel, an appreciation of which is necessary to the understanding of our text. The Divine Plan for human recovery from sin and death God first declared to Abraham: "In thy Seed shall all the families of the earth be blessed."—Galatians 3:8.

Later on, God revealed the fact that Abraham's Seed would constitute a Kingdom class to rule all nations for their uplift. When Israel, by failing to keep the Law, failed to prove itself the holy nation, God declared that He would send a special Messenger of the Covenant, through whom the holy nation would be established.

At His First Advent, our Lord laid the foundation for this work by dying for the sin of the whole world. Then He began to select the Kingdom class. This selection has been the work of the entire Gospel Age, everything else being secondary. Soon the work will be finished. Then the overcomers will share in the First Resurrection.—Revelation 20:6.

### "Abraham's Seed, and Heirs."

Next the Pastor demonstrated that this Kingdom class will be the foretold Seed of Abraham. Jesus was of Abrahamic stock through His miraculous birth. After His resurrection He became Abraham's Seed on the spirit plane—a New Creature. His Church are to be on the same plane.

To Abraham's earthly seed belong certain earthly promises; but these cannot go into effect until the Spiritual Seed have been perfected in the First Resurrection. St. Paul tells us that this Seed of Abraham, Jesus and the Church, are unitedly The Christ. Using the human body as an illustration, he points out that Jesus is the Head and the Church the Body of Christ. Thus we see that St. Paul was anxious to win membership in the Body of Christ, not the probationary one of the present, but the actual Body of the future.

No wonder that St. Paul counted all he had sacrificed as unworthy of mention, when contrasted with the great blessing which had come to the Gospel Church!

### Luck.

"Do you beleve there is anything in luck?" asked a young man of a philosopher, and the philosopher replied:

"Yes; there's a lot of intelligence and method a-d perseverance in it."

### Crops of Greece.

About 24 per cent. of Greece is under cultivation, and 13 per cent. consists of forest lands. The total annual value of the field crops, fruit and animal and dairy products is not less than \$80,000,000.

### A Rhythmical Criticism.

Professor Brander Matthews was talking of certain past participles that have fallen into disuse, reports the Washington Star.

The past participle "gotten" has gone out in England, although it still lingers on with us. In England gotten is almost as obsolete as "putten." In some parts of Cumberland the villagers still use gotten and putten, and a teacher once told me of a lesson on the past participles wherein she gave her pupils an exercise to write on the black-board.

In the midst of the exercise an urchin began to laugh. She asked him why he was laughing, and he answered:

"Joe's put putten where he should have putten put."

sold from \$4.25 to \$5.40; culls and rams, \$2.50 to \$4; lambs sold from \$7.40 to \$7.65, with bucks culled out at 75c per head less.

### Hogs.

Hogs were fully 30c per cwt. lower. Selects, fed and watered, sold at \$8.60.

### MONTREAL LIVE STOCK.

MONTREAL, Nov. 10.—At the Montreal stock yards, west end market, receipts of live stock for the week ended Nov. 8 were 3700 cattle, 2550 sheep and lambs, 2100 hogs and 1000 calves. The supplies on the market this morning for sale consisted of 2500 cattle, 1800 sheep and lambs, 850 hogs and 500 calves.

There was no actual change in the market for cattle today, but as offerings were 1500 below last week prices were slightly firmer. Demands from American buyers continue good. Stockers sold at \$5.40 to \$5.65; common bulls, \$3.90 to \$4.90, and culling cows at \$3.15 to \$3.40 per 100 lbs. Butchers' cattle were active and prices were firm. Really choice steers were in good demand at \$7.40 to \$7.60, and a few picked small lots brought \$7.75 per 100 lbs. Demand was principally for good cattle, which brought \$7 to \$7.25, and a lot of fair stock changed hands at \$6.15 to \$6.35 per 100 lbs.

The stronger feeling which developed in the market for sheep and lambs a week ago was more pronounced today and prices scored a further advance of 25c per 100 lbs., owing to a better demand locally. Western lambs sold at \$7.25 to \$7.50, and some were delivered on contracts made a week ago at \$7 to \$7.25, while ewe sheep brought \$4.50 to \$5 per 100 lbs. Grass fed calves brought 3 1/2c to 4 1/2c, while milk fed stock was fairly active at 5 1/2c to 7 1/2c per lb.

Altho the supply of hogs was less than half what it was a week ago the tone of the market was easier again, and prices scored another decline of 25c per 100 lbs. Demand was good, sales being made of selected lots at \$9.50 and straight lots at \$9.25 per 100 lbs, weighed off at cars.

Butchers' cattle, choice, \$7.40 to \$7.75; do., medium, \$6.50 to \$7.25; do., common, \$5.60 to \$6; canners, \$3.15 to \$4.40; butchers' cattle, choice cows, \$6 to \$6.25; do., medium, \$5 to \$5.50; do., bulls, \$5 to \$6; milkers, choice, each, \$85 to \$90; do., common and medium, each, \$75 to \$80; springers, \$65 to \$70; sheep, ewes, \$4.75; bucks and culls, \$4.25 to \$4.50; lambs, \$6.75 to \$7.50; hogs, f.o.b., \$9.25 to \$9.50; calves, \$5 to \$15.

### CHICAGO LIVE STOCK.

CHICAGO, Nov. 10.—Cattle—Receipts 20,000. Market 10c up. Beefsteaks, \$6.75 to \$9.80; Texas steers, \$6.60 to \$7.75; stockers and feeders, \$5 to \$7.75; cows and heifers, \$3.25 to \$5.25; calves, \$7 to \$11.

Hogs—Receipts 30,000. Market 10c to 15c up; light, \$7.65 to \$8.20; mixed, \$6.65 to \$8.25; heavy, \$7.50 to \$8.25; rough, \$7.50 to \$7.70; pigs, \$5.50 to \$7.75; bulk of sales, \$7.90 to \$8.15.

Sheep—Receipts 32,000. Market strong. Native, \$4.25 to \$5.50; western, \$4.30 to \$5.50; yearlings, \$5.40 to \$6.65; lambs, native, \$6.10 to \$7.95; western, \$6.15 to \$7.90.

### Notorious Land Agent Dead.

DUBLIN, Nov. 11.—The death occurred yesterday of Samuel Hussey, the notorious land agent who was a leading figure throughout the land agitation when Ireland was most turbulent in the eighties. Several attempts were then made on his life and Edinburn, his residence, near Tralee, County Kerry, was greatly damaged by a dynamite bomb on Nov. 26, 1884.

### Independent Liberal Elected.

MONTREAL, Nov. 11.—In the Provincial bye-elections in St. Johns County and Huntingdon County, both returned Liberal candidates to the Legislature. In one case the convention Liberal was beaten and an Independent Liberal candidate elected.

### The Peerless Peninsular Range.

Ayer's Sarsaparilla helps nature to make rich, red blood. No alcohol.

Sold for 60 years.

Ask Your Doctor. Made by J. C. Ayer Co., Montreal, Canada.

## FACTS ABOUT BABIES.

Some That Surprised and One That Pleased the Professor.

"I never knew before I had one," said the professor of physics to his bachelor assistant, "just how closely our science could be applied to a baby. I have been astounded at the following true conclusions:

"As two similar bodies vary in weight as the cubes of their dimensions, I find that a baby two feet long should weigh just about one-sixteenth of a man five feet high; also that, as the surfaces of two similar bodies vary as the square of their dimensions, a baby as before would have about one-sixth the surface of the man. So the extent of surface proportional to weight in the baby is vastly greater than in the adult. In fact, a square foot of the baby's skin would shield just one-third the substance of what a square foot would on an adult.

"Arguing from this and knowing that the rate of cooling of a solid depends on the extent of surface, I found that a baby got cold quicker or warm quicker when exposed to a fire than a man; also, as any living body is higher in temperature than the surrounding air and has to lose heat continually—the rate of loss depending on the surface—it is readily seen that a baby, in order to keep up normal temperature, has to furnish more heat in proportion to its weight than man, and therefore has to eat more in proportion to its weight than man. To prove that a baby gives out an enormous amount

of heat, keep the heat from escaping by wrapping a heavy blanket around it. In a half an hour the temperature under the cover will be almost unbearable to the hand, and the baby will be found covered with sweat.

"The same knotty problem comes up when the baby is bathed. You know yourself how cool you feel when you bathe in a cold room in warm water, but in very little of it, so that most of your wet body is out of the water on account of the heat of your body being taken to evaporate the water? The baby suffers much worse on account of that same big proportion of surface.

"But I find one encouraging thing in this peculiar geometrical problem of the human form. I find that if a dress is made for my little daughter two feet high and one for her mother five feet high, it takes only one-sixth the cloth to do it, although the dresses were made in exactly the same style."—Lawrence Hodge in Chicago Record-Herald.

## Morbid Parisians.

Public executions in Paris prove very profitable to the owners of houses commanding the scene. Windows are let out for the occasion, the landlords watching for the first sign of the execution and then at once sending word to the persons who have hired the room. If an ordinary criminal is executed the charge is usually about \$4 per seat, but should the offender have committed any remarkable crime the price runs up to as much as \$30.

## THEY LOVE THEIR PAJAMAS.

Englishmen Said to Take a Delight in Wearing Them Publicly.

Writing from South Africa about the sights to be seen in that country, E. W. Howe in his monthly says:

"On the line between Bulawayo and Salisbury there are a good many towns, including one built around the best gold mine in Rhodesia. And how the people turned out to see the train come in! At one place we estimated that there must have been 500 around the station.

"Trains travel over the line only two or three times a week, and people seem to come from great distances in the country to see the trains go by. But between the stations there were millions of acres of land as wild as it was in the days of Adam.

"Early in the morning our English passengers walked about in pajamas when we stopped at stations. Englishmen love that sort of thing. At Victoria falls they visited the Rain forest in pajamas, and in Johannesburg I was told that on Sundays and holidays pajamas are worn around houses and yards until lunch time.

"Englishmen show their pajamas so much that I cordially hate that particular form of nightdress. Englishmen have the same passion for running around in pajamas that American boys have for running around in baseball suits."

## JUMPS THE EYE MAKES.

It Sees an Object by Piecemeal and Not at a Glance.

The eye does not take in an object at a glance, but piecemeal. It follows the outline of the object, but does so by jumping from point to point in an irregular manner, never twice alike.

In looking at a large circle, for instance, the movement is not regular, the gaze passing from point to point until a complete mental image of the circle is formed, even though the person undergoing the tests starts at the top of the circle and attempts to follow its outline all around back to the starting place. Such ocular movements are so rapid that one is not aware of them.

Proof of the irregular movement of the eye may be provided, according to the Optical Journal and Review, by means of the motion picture camera. A small, bright light is placed across the room, and this forms a small image on the cornea of the eye. As the eye attempts to follow the curve of the test object the motion picture camera takes a rapid succession of views of the eye and its bright spot. Then a comparison of the resulting prints and the position of the bright spots in each shows the movements of the eyeball in following the circle.

## Old French In Official England.

One may not be ignorant, perhaps, that French, old French, remains as the language used in certain royal proclamations in England.

So when "the king's assent" is given before the throne in "the painted chamber" the clerk cries in the language of our father, "Le roy le veult," ("the king so pleases"). If the bill that he is asked to approve is a money bill the clerk adds after a profound obeisance, "The king thanks his good subjects, accepts their benevolence and is pleased." The proclamation on as-

## MESPLET THE PRINTER

Montreal's Pioneer Publisher Stormy Petrel.

There are three separate and introductions of the art of print Canada. Each was in widely fields, and, therefore, catering to different classes of the population and different sections of the country.

The introduction that holds its own in point of time is that of 1775 Bartholomew Green, son of a t who printed the first American paper, went from Boston, Halifax, N.S.—both British at that time—and set up a printing in the recently founded Nova Scotia. Green died within months after his coming to Halifax his place in the community was by John Bushell, who, in March began to publish the Halifax the first newspaper printed in

The second introduction to twelve years later, when, in 1787, a firm of Brown and Gilmore of Philadelphia, still a British city, came and opened a printing establishment which produced for the government official Gazette and other official paper, all of which were published in two languages. This was only for the purpose of turning the year after the signing of the Treaty of Paris which finally ceded Canada to the British Crown.

These two introductions of are commonplace events in comparison with the third introduction, which place in 1776, at Montreal during the war of the American Revolution, was somewhat a war measure, the purpose of turning the Canadians from their allegiance to the British Crown.

First something about the career of the remarkable man printing presses were the first to rattle and clanked in the metropolis of Canada.

Fleury Mesplet was born at Lyon in 1735 in the city of Lyons, where, after receiving a good education, he learned and for a few years, the printer's trade was than that he became a with republican ideas, which were coming to think were for the evils of misgovernment weighing heavily upon France also became an open free-thinker; this unbelief clung to him for years afterwards.

Arriving at Montreal, Mesplet, his wife and employees put up a tavern, where they remained for some time. On May 18th, they were in premises ready for business.

And now the mission on which Mesplet was engaged came to Franklin and his fellow countrymen failed to stir up the French-Canadian against the loyalists' cause, Mesplet had been killed by the walls of Quebec.

His most ambitious undertaking was a journal devoted to commerce and literary subjects, and the of his news editor brought him the evil influence of Valentin a lawyer by profession, who had to Canada from France.

Mesplet, before beginning the publication of his paper, engaged in a sort of anything offensive to the government or the church.

The editor, Jantard, soon violated his promise. In September, Sir Guyton, the Governor-General, ordered the province, but, owing to their behalf, and the representation that Montreal needed a printer order of banishment was issued upon Mesplet and his associates the oath of allegiance, and permitted to submit in future all articles to government censor, which office was abeyance.

Jantard further began to at times in signed articles published

## COUNTY OF LENNOX AND ADDINGTON

## Treasurer's Sale of Lands for Taxes.

COUNTY OF LENNOX AND ADDINGTON } BY VIRTUE OF A WARRANT under the hand of the Warden and seal of the County of Lennox and Addington, bearing date the 31st day of July, A. D. 1913, and to me directed, commanding me to levy upon the lands mentioned in the following list for arrears of taxes due thereon and the costs as therein set forth.

I hereby give notice that unless the said arrears and costs are sooner paid I shall proceed to sell the said lands, or so much thereof as may be necessary for the aforesaid taxes and costs, at the Court House, in the Town of Napanee, by Public Auction, on MONDAY, THE 24th DAY OF NOVEMBER, AND THE FOLLOWING DAY, IF NECESSARY, in the present year of A. D., 1913, beginning at the hour of ten o'clock in the forenoon, and in compliance with the provisions of the Assessment Act.

The public will please remember that this is a strictly CASH sale. Private cheques will not be accepted in settlement unless marked by the bank upon which they are drawn.

Non-patented or any lands in which the Crown has an interest are sold subject to these provisions.

MATTHEW RYAN, W. J. SHANNON,  
Warden. Treasurer of the County of Lennox and Addington.

County Treasurer's office, Napanee, July 31st, 1913.

**MATTHEW RYAN,**  
Warden.

**W. J. SHANNON,**  
Treasurer County of Lennox and Addington

County Treasurer's Office, Napanee, July 31st, 1913.

First published in THE NAPANEE EXPRESS, at Napanee, in the County of Lennox and Addington, on August 22nd, 1913.

No when "the king's assent" is given before the throne in "the painted chamber" the clerk cries in the language of our father, "Le roy le veult," ("the king so pleases"). If the bill that he is asked to approve is a money bill the clerk adds after a profound obeisance, "The king thanks his good subjects, accepts their benevolence and is pleased." The proclamation on ascending the throne is preceded by the traditional call of the French heralds of former times, "Oyez, oyez, oyez!"

Alas, that time has disfigured this old world of our country, and today the phlegmatic English herald cries thrice to the people: "Oh, yes! Oh, yes! Oh, yes!"—*Cri de Paris.*

### National Baths.

He was a gentleman who was in Washington as a minister representing Honduras. Diplomats, according to the popular conception, never say the wrong thing. They are believed to be the delicacy of language and the fineness of vocabulary. This particular diplomat entered an uptown barber shop in Washington and got a shave after he had explained what he wanted in words which were more full of accent than of fluency.

"Now, sir," said the barber briskly, "can't we give you a Turkish bath?"

"No-o-o!" replied the man from Honduras, with some hesitation. "You see, I'm no—no Turk."—*Popular Magazine.*

### Plants and Electricity.

The idea of growing plants by electricity has been referred to as the "last cry" in gardening and floriculture; but, as a matter of fact, the idea is nearly a couple of centuries old. As long ago as 1747 electricity, as an aid to plant cultivation, was advocated by a writer in the old Gentleman's Magazine, who mentioned the astounding results he had achieved from electrifying a myrtle seventeen times.—*London Tit-Bits.*

### A Thackeray Slip.

Thackeray asked Lowell to point out candidly any error of Queen Anne English in the novel "Henry Esmond." Lowell asked if people used at that time the phrase "different to."

"Hang it all!" cried Thackeray. "No, of course they didn't."

### Draws the Line There.

"All the world loves a lover," quoted the wise guy.

"Yes, but it hates to buy wedding presents for him," added the simple mug.—*Philadelphia Record.*

### Sometimes They Are Wrong.

"A woman never admits that she was wrong."

"I don't know about that," replied Mr. Meekton. "A number of them seem particularly anxious to prove that they showed pretty poor judgment in selecting husbands."—*Washington Star.*

### Enough to Make Him Rave.

"What is the editor of the health hints department raving about?"

"A rich woman writes that she gives private moving picture shows in her home, and she wants to know if they will injure her poodle's eyes."—*Birmingham Age-Herald.*

### Its Limitations.

A sweet disposition is a great institution as a general thing, although of little assistance in driving mules.—*Atchison Globe.*

pret and his editor, Jantard, the province, but, owing to petit their behalf, and the repress that Montreal needed a print order of banishment was sus upon Mesplet and his associate the oath of allegiance, and pro to submit in future all articles to ernment censor, which office fe abeyance.

Jantard further began to att judges in signed articles publi this paper. One judge, asked t ernment at Quebec, to protect the from such attacks. This broug ters to a head, and the two me arrested and taken to the n prison at Quebec.

Escaping from prison with t nance of the authorities, Mes turned to Montreal, and resum printing, but financial trouble tinued to dog his footsteps, a printing plant was seized and s debt. He afterwards leased it ar on with his business.

After a troubled career, Mespl on January 24, 1794, aged ab years.

### More Bison Found.

Three distinct herds of wild have been located west of the River, on the extreme northern ary of Alberta, by a party of under the direction of A. J. Be ernment agent at Fort Smith, s by the Dominion forestry depa Pierre Squirrel, chief of a tr northern Indians, who was gu the party, estimates there are fu animals in the herds.

The buffalo resemble the Ar bison, from which they descend life in the hilly regions has mad more agile and fleet of foot. travel in twos and threes in t mer, herding together in the wir protection against the timber their natural enemy. It is an here that the government wi steps at once to prevent the ext tion of the herds by hunters a ther protect the animals by inc the wolf bounty.

Harry V. Radford, an explor covered a herd in the north tw ago.

### Lady Evelyn's Toronto Sh

Lady Evelyn Ward, since her to England, has been staying i Hon with her brother-in-law and Lord and Lady Hugo Grosven her arrival in Canada. Lady started a shop in Toronto for t of blouses, etc., which is said t been a great success. She will August in Ireland with her pare Earl and Countess of Erne, a Castle, and will later in the au join her husband, the Hon. Ward, in Canada.

### Two Storied.

Elmer, aged six, accompan father to the circus one aft Among the many strange and dering things he saw was oi standing on the shoulders of a "Look, papa!" he exclaimed. "a two story man!"—*Chicago Ne*

### To Make Sure.

Mrs. Younglove—If I wasn't baby was sick I do believe I spank him. Younglove—Wel make sure. You begin spank! I'll go for the doctor.—*Puck.*

## MESPLET THE PRINTER.

cal's Pioneer Publisher Was a Stormy Petrel.

re are three separate and distinct actions of the art of printing into a. Each was in widely separate and, therefore, catering to differences of the population and differences of the country.

Introduction that holds first place of time is that of 1751, when Blomew Green, son of the man printed the first American newspaper from Boston, Mass., to x, N.S.—both British cities at time—and set up a printing press recently founded capital of Scotia. Green died within a few years after his coming to Halifax, but his name in the community was taken by Bushell, who, in March, 1752, to publish the Halifax Gazette, first newspaper printed in Canada. A second introduction took place years later, when, in 1764, the f Brown and Gilmore of Philadelphia still a British city, came to Quebec and opened a printing establishment produced for the government the Gazette and other official material of which were published in the languages. This was only four years after the signing of the Treaty of which finally ceded Canada to the Crown.

se two introductions of printing commonplace events in comparison with the third introduction, which took place in 1776, at Montreal during the f the American Revolution, and somewhat a war measure, taken for purpose of turning the Frenchmen from their allegiance to the Crown.

t something about the early of the remarkable man whose presses were the first that ever clanked in the commercial bolis of Canada.

ry Mesplet was born about the 1735 in the city of Lyons, France, after receiving a good common education, he learned and followed few years, the printer's trade. It was here that he became saturated with republican ideas, which many coming to think were a cure-all for the evils of misgovernment then reigning heavily upon France. He became an open free-thinker, and unbelief clung to him for many years afterwards.

iving at Montreal, Mesplet and his wife and employees put up at a house, where they remained eleven months. On May 18th, they were in leased seats ready for business.

now the mission on which Mesplet was engaged came to nought. His lin and his fellow commissioners to stir up the French-Canadians to the loyalists' cause. Monty had been killed before the of Quebec.

most ambitious undertaking was most devoted to commercial news tery subjects, and the selection of news editor brought him under the influence of Valentin Jantard, yer by profession, who had come from France.

plet, before beginning the publication of his paper, engaged not to interfere in anything offensive to the government or the church.

editor, Jantard, soon violated the promise. In September, Sir Guy Carleton Governor-General, ordered Mesplet and his associate taking oath of allegiance, and promising to print in future all articles to a government censor, which office fell into the hands of Jantard. Jantard further began to attack the

## ORIGIN OF INDIAN.

Dr. Ales Hrdlicka Finds Traces in Southern Siberia and Mongolia.

Recent investigations by many scientists indicate that the original Indian population of America was the overflow of the aboriginal population of south-eastern Asia and Mongolia. Dr. Ales Hrdlicka, who lately returned from that region and says he found striking evidences that the theory is correct. He bases his belief not only on the prehistoric remains found in this little explored region, but on the striking resemblance of the existing race of natives to the American Indians.

Dr. Hrdlicka explored southern Siberia, both east and west of Lake Baikal. He extended his search into outer Mongolia. The capital, Urga, and two large monasteries of the region are constantly visited by natives from all the surrounding country. On one occasion he had a chance to see a gathering of 7,000 natives in one place.

The museums of Siberia proved unexpectedly rich in ethnological and archeological material bearing on his search.

There are thousands of "kourgans," or burial mounds, that date back through the development of the native race to the period when they were in the stone age and no metal implements were known.

All the measurements, both facial and physical, of the natives tend to confirm the theory that they are the originals of the American Indian stock, and some of the photographs of the living natives are so strikingly like the present day Indians that it would be impossible to tell them apart. In this connection he says:

"Among all these people there are visible many and unmistakable traces of admixture or persistence of what appears to have been the older population of these regions, pre-Mongolian and especially pre-Chinese, and those best representing these vestiges resemble to the point of identity the American Indian."

"These men, women and children are brown in color, have black straight hair, dark brown eyes and facial as well as bodily features which remind one most forcibly of the native Americans. Many of them, especially the woman and children, if introduced among the Indians and dressed to correspond, could by no means at the disposal of the anthropologist be distinguished apart. The similarities extend to the metal makeup of the people and even to numerous habits and customs which new contacts and religions have not as yet been able to efface."

As a result of what he saw Dr. Hrdlicka expresses the belief that there exist to-day over large parts of eastern Siberia and in Mongolia, Tibet and other regions in that part of the world numerous remains of an ancient population (related in origin perhaps with the latest paleolithic European) which was physically identical with and in all probability gave rise to the American Indian.

# The Siege of The Seven Suitors

By  
MEREDITH NICHOLSON

Copyright, 1910, by Meredith Nicholson

"If you are going to be silly you will find me little inclined to nonsense."

"Shall we talk of the Asolando? I haven't been back since I saw you there, and yet—let me see, isn't this your day there?"

She seemed greatly amused, and her laughter rose with a fountain-like spontaneity and fell, a splash of musical sound, on the mellow air of the orchard. She had changed her position as I joined her, sitting erect and kicking her heels lazily against the wall.

"Mr. Chimney Man, something terrible happened just after you left that afternoon. I was bounced, fired—I lost my job."

"Incredible! I'm sure it was not for any good cause. I can testify that you were a model of attention—you were surpassingly discreet. You repelled me in the most delicate manner when I intimated that I should come often on the days that you made the change."

"The sad part of it was that that was not only my last day, but my first! I had never been there before, except for a nibble now and then when I was in town. But I couldn't stand it. It was like being in jail—in fact, I think jail would be preferable. But I'm glad I spent that one day there. They dispensed with my company because I remarked to one of the silly girls who are making the Asolando their lifework that I thought the English pre-Raphaelites had carried the dish face rather too far. The girl to whom I uttered this heresy was so shocked she dropped a teacup—you know how brittle everything is in there—and I came home. You were really the only adventure I got out of my day there. And I didn't find you entirely satisfactory."

"Thank you, Francesca, for these confidences. And having lost your position you are now free to roam the hills and dream on orchard walls. Your scheme of life is to my liking. I can see with half an eye that you were born for the open and that the walls of no prison house can ever hold you again."

She nodded a dreamy acquiescence.

Then she turned two very brown eyes full upon me and demanded:

"What is your name, please?"

I mentioned it.

"And you doctor chimneys? That sounds very amusing."

"I'm glad you like it. Most people think it absurd."

"What are you doing here? There's not a chimney in sight."

and pieces of eight. And they say I'm just like her." She is the most perfectly killing person in the world." Hezekiah laughed again.

## CHAPTER VIII.

### Nine Silk Hats Cross a Stile.

SO this was the child whose devotion had rendered Wiggins so miserable and the sister of whom Cecilia Hollister and her aunt had spoken so strangely. I had not suspected it. She was as unlike Cecilia as possible, and the difference lay in her independent spirit and bubbling humor.

She jumped down from the wall, shook three apples from a tree and sustained them in the air with the deftness and certainty of practiced jugglery. Her absorption was complete, and when she wearied of this sport she fung the apples away, one after the other, with a boy's free swing of the arm. Her-rick would have delighted in her. Dobson would have spun her bright hair into a rondeau, but only Aldrich, with a twinkle in his eye, could have brought her up to date in a dozen chiming couplets.

She had gone on up to the crest of the orchard and stood clearly limned against the sky, her hands thrust into the pockets of her sweater. She appeared to be intent upon something that lay beyond and half turned her head and summoned me by whistling. I liked this better than the quotation method of address. It was a clear, shrill pipe, that whistle, and she emphasized it further by a peremptory wave of her arm. When I stood beside her I was surprised to find that the site commanded a wide area, including the unmistakable roofs and chimneys of Hopfield Manor, half a mile distant.

"You will see something funny down there in a minute. They are out of sight now, but there's a stile, the kind with steps, just beyond those trees. It's in a path that leads from the Prescott Arms to Aunt Octavia's. Look!"

My eyes discovered the stile. It was set in a wall that was, she told me, the boundary dividing Hopfield Manor from another estate nearer our position.

Suddenly a silk hat bobbed in the path beyond the stile. It rose as its owner mounted the steps, it paused an instant when the top of the stile was reached, then quickly descended and came toward us, a black blot above a black coat. I was about to ask her the meaning of this apparition when a second silk hat bobbed in the path and then rose like its predecessor, descending and keeping on its way until hidden from our sight by shrubbery. A third, fourth, fifth, sixth, seventh, eighth and ninth followed. Nine gentlemen in silk hats crossing a stile in a lonely pasture between woodlands; so much was plain to the eye from our vantage ground. But I groped blindly for an explanation of this spectacle. The bobbing hats and dark coats suggested wanderers from some dark Plutonian cave, bent upon mischief to the upper world. Their step was jaunty—they moved as though drilled to the same cadence.

We waited a moment, expecting that another figure might join the strange procession, but nine was the correct count. I looked down to find Hezekiah checking them off on the fingers

Nine Gentlemen in Silk Hats Crossing a Stile.

Wiggy's chances?"

"Of winning your sister? I should say from my knowledge of Wiggins that he is a man much given to staying in a game once the cards are shuffled."

"Then you think he knows the game?"

There seemed to be something beneath the surface meaning of her words, but I answered:

"Wiggy's affairs have been few, and, while he may not know the game in all its intricacies, he has a shrewd if rather slow mind, and, besides, he has asked my help in the matter."

"One of these speak for yourself."

John situations, then? Well, I should say, Mr. Chimney Man, I should say"—

She made ready for flight, looking ahead to be sure of a clear thoroughfare.

"I should say," she concluded, setting her skirts, "that that indicates considerable intelligence on Wiggy's part."

The tires rolled smoothly away, the gravel crunching, the pebbles popping. The white sweater clasped a straight back snugly; then suddenly, as the wheels gained momentum, she bent low for a spurt, and her rapidly receding figure became a gray blur in the purple dusk.

Miss Octavia was in the gayest spirits at dinner that night, and struck afled at once with one of her amusing dicta.

"Human beings," she said, "may be divided into two groups—interesting and uninteresting, but idiots abound in both classes."

Cecilia and I discussed this with more or less gravity, until we had exhausted the possibilities, Miss Octavia following with apparent interest and setting us off at a new tangent when our enthusiasm lagged. She referred in no way whatever to her chimneys, nor did she ask me how I had spent the day. I felt the pleading of Cecilia's

there is even now a gooseberry that I shall send to Hezekiah, w reasons I need not explain, do now visit here."

"But the dyspepsia man—you of him as though he were dead."

"Your assumption is correct Ames. The builder of Hopfield only a few weeks after he had lished himself in this house. I entered upon the enjoyment well earned leisure and made necessary that he should ever less to bed, he gave himself up fortnight to a mad indulgence in ringues and died after great suif steadily refusing his own medk the end."

We still lingered in the pie after this diverting recital, while Octavia entertained me with her on pies.

"The soul color of pies varies ly, Mr. Ames. It has always a me that apple pie stands f homeller virtues of our civilizati is substantial, nutritious and The custard and lemon varietl feminine and do not, perhaps fo reason, appeal to me. Cherry its best is the last and final expr of the pie genus, and where have been careful in eliminatin seeds and the juice hasn't mad den dough of the crust a cheri meets the soul's highest demand the gooseberry I find a certain ness or, if I may use the expres

zip, that is highly stimulating. qualities you will observe in He: if you come to know her well."

"I have already formed a high ion of Miss Hezekiah, and I deal harshly with any one who tured to criticise her in any pl lar," I replied.

"Will you kindly inform me when you made the acquaintar my younger niece? I should g dislike to believe you guilty o simulation, but when Hezekiah mentioned in the gun room last your silence led me to assume she was wholly unknown to you

"She was, I assure you, at th ner hour last night. But I m quite by chance this afternoon orchard at no great distance this house."

Miss Octavia paused in the ba bent her head in thought for ment.

"May I inquire whether she re in any way to Mr. Wiggins in tl terview?"

"She did, Miss Hollister," I re And I could not help smiling as

you turned two very brown eyes full upon me and demanded:

"What is your name, please?"

I mentioned it.

"And you doctor chimneys? That sounds very amusing."

"I'm glad you like it. Most people think it absurd."

"What are you doing here? There's not a chimney in sight."

"Oh, I have a commission in the neighborhood, Hopfield Manor. You may have heard of Miss Hollister's place."

"Of course, every one knows of her."

"And now that I think of it, it was she about whom you asked in the Asolando that afternoon. You wanted to know what she said about the tea room."

"I remember perfectly."

"She was quiet for a moment, then she threw back her head and laughed that rare laugh of hers. 'You might let me into the joke.'"

"It wouldn't mean anything to you. I have a lot of private jokes that are for my own consumption."

"Your way of laughing is adorable. I hope to hear more of it. In the Asolando you repulsed me in a manner that won my admiration, but I venture to say now that, if you roam these pastures, I am the grass beneath your feet, and if yonder tuneful water be sacred to you I sit beside the brook to learn its song."

"You talk well, sir, but from your tone I fear you can't forget that we met first in the Asolando. That day of my life is past, and I am by no means what you might call an Asolanded. I don't seem to impress you with that fact. I'm a human being, not to be picked like a red apple, or trampled upon like grass, or listened to as though I were a foolish little brook. I'm greatly given to the highway, and I prefer macadam. I like asphalt pavements, too, for the matter of that. I should love a motor, but lacking the coin I pedal a bicycle. My wheel lies down there in the bushes. You see, Mr. Chimney Man, I am a plain spoken person and have no intention of deceiving you. My name was Francesca for one day only. It may interest you to know that my real name is Hezekiah."

"Hezekiah! Then you are Cecilia's sister and Miss Hollister's niece?"

"Guilty."

"And you live?"

"Over there somewhere beyond that ridge." And she waved her hand vaguely toward the village and laughed again.

"Pray tell me what this particular joke is. It must be immensely funny." I urged, struggling with these new facts.

"Oh, it's Aunt Octavia! She will be the death of me yet. You know the girl who waited on Aunt Octavia that afternoon took all that artistic nonsense as seriously as a funeral, and she told me after you left, with the greatest horror, that Aunt Octavia had asked for a cocktail." That laugh rippled off again to carry joy along the planet trails above us. "But you know," she resumed, "that Aunt Octavia never drank a cocktail in her life and wouldn't. She doesn't know a cocktail from soothing sirup. She pines for adventures. She is just like a boarding school girl who has read her first romance of the young American engineer in a South American republic shooting the insurgents full of tortillas and marrying the president's dark eyed daughter. She reads pirate books and is crazy about buried chests

tonian cave, bent upon mischief to the upper world. Their step was jaunty—they moved as though drilled to the same cadence.

We waited a moment, expecting that another figure might join the strange procession, but nine was the correct count. I looked down to find Hezekiah checking them off on the fingers of her slim brown hand.

"Has there been a funeral, and are they the returning pall bearers?" I inquired.

"Not yet," she replied.

Her face showed amusement. The twitching of her lips encouraged hope that another of those delightful laughs was imminent. She said:

"Those are Cecilia's suitors. They have been to Aunt Octavia's to tea. They're staying at the Prescott Arms probably."

"They're terribly formal. I can't get rid of the impression of somberness created by those fellows. You'd hardly expect them to tramp cross country in those duds. Such grandeur should go on wheels."

"Oh, they are afraid of Aunt Octavia. She won't allow a motor on her grounds, and I suppose they're afraid they might break some other rule if they went on any kind of wheels. She's rather exacting, you know, my Aunt Octavia."

"I was at the Prescott for luncheon today, and I must have seen these gentlemen there."

"Oh, you were at the Prescott?"

Almost for the first time her manner betrayed surprise, but mischief danced in the brown eyes. With Wiggins' confession as to the havoc he had played with Hezekiah's confiding heart fresh in my memory, I felt a delicacy about telling her that it was to see Wiggins that I had visited the inn. But to my surprise she introduced the subject of Wiggins immediately and with laughter struggling for one of those fountain-like splashes that were so beguiling.

"Oh, Wiggy is staying there! Do you know Wiggy?"

"Know Wiggy, Hezekiah? I know no man better."

"Wiggy is no end of fun, isn't he? I've heard him speak of you. You are his friend the chimney man. He was the last man over the stile. Did you notice that he lingered a moment longer at the top than the others? From his being the ninth man I imagine that he was the last to leave the house, and he probably felt that this set him apart from the others. Wiggy is nothing if not shy and retiring."

A heartbroken, lovelorn girl did not speak here. She whistled softly to

herself as we descended. The air was cooling rapidly, and the west was hung in scarlet and purple and gold. The horse neighed in the road below, and I knew that I must be on my way to the manor.

"Hezekiah," I said when I had drawn her bicycle from its hiding place, "you'd better leave your wheel here and let me drive you home. It's late, and there's frost in the air. I imagine it's some distance to your house."

"Thank you, Mr. Chimney Man; it is much farther to Aunt Octavia's. But tell me this: What do you think of

### Dr. de Van's Female Pills

A reliable French regulator; never fails. These pills are exceedingly powerful in regulating the generative portion of the female system. Refuse all cheap imitations. Dr. de Van's are sold at 25¢ box, 3 for \$1.00. Mailed to any address. The Scobell Drug Co., St. Catharines, Ont. Or at Hooper's Drug Store.

Cecilia and I discussed this with more or less gravity, until we had exhausted the possibilities, Miss Octavia following with apparent interest and setting us off at a new tangent when our enthusiasm lagged. She referred in no way whatever to her chimneys, nor did she ask me how I had spent the day. I felt the pleading of Cecilia's eyes that I should accept the situation as it stood, and having already agreed to Wiggins' suggestion that I abide in Miss Hollister's house as a spy—for this was the ignoble fact—I felt the threads of conspiracy binding me fast. So far as my hostess was concerned, I was now less a guest than a member of the household.

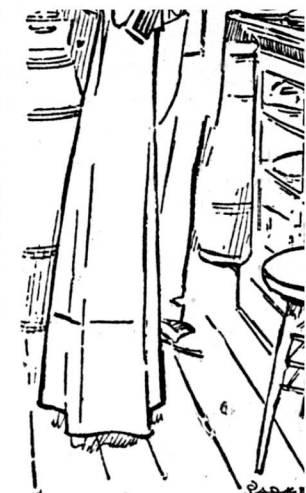

The variety of subjects that Miss Octavia suggested was amazing. From aeronautics to the negro question, from polar exploration to the political conditions in Bulgaria, she passed with the jauntiest insouciance and apparently with a considerable fund of information to support her positions. She knew many people in all walks of life.

As we rose from the table Miss Octavia declared that she must show me the pie pantry. I was now so accustomed to her ways that I should not have been in the least surprised if she had proposed opening a steel vault filled with a mummified Egyptian dynasty.

"The gentleman who built this house," she explained, "had already grown rich in the manufacture of the famous ribless umbrella before he acquired a second fortune from a nostrum warranted to cure dyspepsia. He was inordinately fond of pies, and in order that this form of pastry might never be absent from his home, he had a special pantry built to which he might adjourn at his pleasure without any fear of finding the cupboard bare."

She led the way through the butler's pantry and into a small cupboarded room adjoining the table linen closet. At her command the butler threw open the doors and disclosed lines of shelves so arranged as to accommodate in the most compact and orderly form imaginable several dozens of pies. These pastries, in the pans as they had come from the oven, peeped out invitingly. Miss Octavia explained their presence in her usual impressive manner.

"It was one of the conditions of the sale of this house to me by the original owner's executors that the pie vault should be kept filled at all times, whether I am in residence here or not. He felt greatly indebted to pie for the success of the dyspepsia cure. It had widened and steadily increased the market for the cure, and pie was to him a consecrated and sacred food. It was his habit to eat a pie every night before retiring, and on the nightmares thus inspired he had planned the strategy of all his campaigns against dyspepsia. The man had elements of greatness, and these shelves are a monument to his genius. In order to keep perfect my title to this property it is necessary for me to maintain a pastry cook, and as I do not myself care greatly for pie the total output is distributed among the people of the neighborhood every second day. The station agent at Bedford is a heavy consumer, and a retired physician at Mount Kisco has a standing order for a dozen a week. My niece Hezekiah, of whom you have heard me speak, is partial to a particular type of pie, and one only: It is the gooseberry that delights Hezekiah's palate, and under G in file 3, in the corner behind you,

"The soul color of pies varies," Mr. Ames.

membered Hezekiah's laughter mention of my friend. My snout escape Miss Octavia.

"Just how, may I ask, did she do to Mr. Wiggins?"

"As though she thought him the nearest of human beings. She lusciously at the bare mention name."

"It was not your impression that she was deeply enamored (that she was eating her heart out)?"

"Decidedly not, Miss Hollister gave me quite a different idea."

"You relieve me greatly. Mr. Wiggins' sense of humor is the silliest and I should not in the least him for Hezekiah. And besides not yet ready to arrange a man for her."

She laid the slightest stress final pronoun. It was a fair inference, then, that Miss Cecilia's affair being "arranged," when they had determined a husband would be for Hezekiah. I did not doubt Miss Hollister's intentions toward nieces were the friendliest, no matter what strange devices she might use to bend those young women to her poses.

### CHAPTER IX.

#### Cecilia's Silver Notebook.

MISS HOLLISTER disappeared in the hall without a word, and I entered the library and found Cecilia sitting alone by the fire. She put aside a book she had been reading and, seeing that she had not followed me, asked of me my visit to the inn.

"I conveyed your message," I answered, "but you have seen Mr. Wiggins since, unless I am greatly taken."

"Yes; he called this afternoon had several callers at the tea but had rather expected you back."

"The fact is," I replied, "that I had taken luncheon at the Prescott Arms I got lost among the hills while in the act of robbing an orchard I came most unexpectedly upon your sister."

"Hezekiah!"

"The same. And, oddly enough, had met her before, though I realize it was she until the meeting at the orchard. It was in the Asolando that I saw her; she was at the wicket the afternoon I met her there."

"You have given me information, Mr. Ames. I did not know that

is even now a gooseberry pie shall send to Hezekiah, who, for as I need not explain, does not sit here."

the dyspepsia man—you speak as though he were dead." My assumption is correct, Mr. The builder of Hopefield died few weeks after he had established himself in this house. Having upon the enjoyment of his earned leisure and made it unvarying that he should ever go plied, he gave himself up for a while to a mad indulgence in meat and died after great suffering, refusing his own medicine to live.

still lingered in the pie crypt his diverting recital, while Miss Octavia entertained me with her views

soul color of pies varies greatly. Ames. It has always seemed that apple pie stands for the virtues of our civilization. It is stantial, nutritious and filling. stard and lemon varieties are common and do not, perhaps for that appeal to me. Cherry pie at is the last and final expression of pie genius, and where cooks are careful in eliminating the acid the juice hasn't made enough of the crust a cherry pie is the soul's highest demands. In a gooseberry I find a certain racial, if I may use the expression,

it is highly stimulating. Both as you will observe in Hezekiah come to know her well." We already formed a high opinion of Miss Hezekiah, and I should not wish to say anything to offend her with any one who would criticize her in any particular.

you kindly inform me just how you made the acquaintance of my neighbor? I should greatly to believe you guilty of disloyalty, but when Hezekiah was in the gun room last night I should have led me to assume that I was wholly unknown to you." "I assure you, at the dinner last night. But I met her by chance this afternoon in an elevator at no great distance from here."

Octavia paused in the hall and her head in thought for a moment.

I inquire whether she referred to Mr. Wiggins in this interview? "I did, Miss Hollister," I replied. "I could not help smiling as I re-

Hezekiah had ever been connected with the Asolando."

"Oh, it was only that one historic day. She says the place was unbearable. She jarred the holdest chords of the divine lyre by harsh comments on the pre-Raphaelite profile. One of the devotees was so shocked that she dropped a plate or something and, to put it coarsely, Hezekiah got the bounce."

My description of Hezekiah's brief tenure of office at the Asolando seemed to amuse Cecilia greatly.

"There is no one like my sister," she said. "There never was and there never will be any one half so charming. Hezekiah is an original, who breaks all the rules and yet always sends the ball over the net. And it is because she is so inexpressibly dear and precious that I am anxious that nothing shall ever hurt her—nothing mar the sweet, beautiful child spirit in her."

It was my turn to laugh now. Cecilia's manifestation of maternal solicitude for Hezekiah seemed absurd, for Hezekiah in her way was older. Hezekiah had raced with Diana and plucked arrows from her girdle—she had heard Homer at the roadside singing of Achilles' shield.

"Hezekiah is reasonably safe, I should say, because she is so amazingly swift of foot and eye and so nimble of speech. She is not to be caught in a net or tripped with a word."

"I suppose that is so," remarked Cecilia soberly. "You thought her happy when you met her today? She did not strike you as being a girl with a wound in her heart? She wasn't particularly sad?"

"Not more so than sunlight on rippled water or the song of the lark ascending."

"Of course you made no reference to Mr. Wiggins? If I had imagined you would meet her I should have."

She ended with an embarrassment that I now understood, and I broke in cheerfully.

"We did mention him. She asked me if I had seen him, and it was the thought of him that evoked her merriest laughter."

She shook her head and sighed, then her manner changed abruptly.

"You delivered my message to Mr. Wiggins?"

"I did. He is badly out of sorts and sees nothing clearly. He is very bitter toward your aunt. He thinks she has treated him outrageously."

"Aunt Octavia has done nothing of the kind," she replied with spirit. "Mr. Wiggins has no right to speak of Aunt Octavia save in terms of kindness. If her wits are sharper than his, it is not her fault, that I can see. But there are matters here that I do not understand, Mr. Ames. I trust you, as my aunt evidently does, or I should not be talking to you as I am, and I am moved to ask a favor of you, a favor of considerable weight, in view of the fact that you are a professional man, with, doubtless, many pressing calls upon your time."

I bowed humbly before this compliment. My time had been lightly appraised by Miss Octavia and again by Wiggins. A long telegram from my assistant that reached me while I dressed for dinner had urged my immediate attendance upon my office. Some of my best clients, now reopening their houses for the winter, were in desperate straits. But, Octavia Hollister did not count in the life of every young

NO WASTE | HAMILTON, CANADA | NO RUST**

We rose and stood up at seven places when a moment later Miss Octavia entered. She greeted the suitors graciously and then in her most charming manner called one after another to sit beside her on a sofa.

The time apportioned being weighed with nicety, so that none might feel himself slighted or preferred. These interviews consumed more than half an hour, and the movement thus occasioned gave considerable animation to the scene.

It may seem ridiculous that nine gentlemen thus paying court to a young woman should call upon her at the same hour, but I must say that the gravity of the suitors and the entire sobriety of Cecilia did not affect me humorously, nor did I feel at all out of place in this strange company. I found myself agreeably engaged for several minutes in discussing with the Oklahoma professor, who proved to be a delightful fellow. His experience of life was apparently wide, and he told me with an engaging frankness of his meeting with the Hollisters in France and of his pursuit of them over many weary miles the previous summer. As no one had elected his courses in the university at the beginning of the fall term, he had been granted a leave of absence, and this accounted for his freedom to press his suit at Hopefield Manor at this season. He was a big fellow, with clean cut features, and bore himself with a manly determination that I found attractive.

He alone, I may say, of the nine men who had thus appeared in Miss Octavia's library met me in a cordial spirit. Even Wiggins seemed not wholly pleased to find me there again, though he had asked me to remain. The manner of the others expressed disdain, suspicion or fierce hostility.

When the last man rose from the davenport Miss Octavia called me to her side. She seemed contrite at having neglected me during the day, but assured me that later she hoped to place an entire day at my disposal. As we talked the nine suitors sat in a semicircle about Cecilia, while the group listened to an anecdotal exchange between Professor Home and Henderson, the Virginia planter. My opinion of Cecilia Hollister as a girl of high spirit, able to carry off any situation no matter how difficult, rose to new altitudes as I watched her. If this strange wooing was not to her liking she certainly made the best of it. She capped Henderson's best story with a better one in negro dialect, and no professional entertainer could have improved upon her recital. As she finished we all joined in the general laugh. Lord Arrowood's mother began

Lord Arrowood had retreated discreetly toward the door, and the others had risen and stood close behind Cecilia, whose gaze was bent rather accusingly upon me.

A dark thought had crossed my mind. As our eyes met I felt that she had read my suspicions and did not wholly reject them. Henderson was valiantly poking the logs, while one of two of the other men gave him the benefit of their advice. I crossed the hall to the drawing room, but no one was there. I went back to the billiard room, but saw nothing of Miss Octavia. Cecilia had rung for the footman, and I passed him in the hall on his way to answer her summons. I stopped him with an inquiry on my lips, but I could not ask the question. Even in my perplexity as to the cause of the chimney's remarkable performances I did not so far forget myself as to communicate my suspicion to a servant.

"Nothing, Thomas," I said, and the man passed on.

It was possible, of course, that Miss Octavia knew more than she cared to tell about the erratic ways of the library chimney, or she might indeed be the cause of its vagaries. Sufficient time had elapsed after retirement from the library to allow her to gain the roof and clap a stopper on the chimney pot. This did not, however, account for the fact that on the previous evening she had been present in the library when the same chimney had manifested a similar sulkiness. I was still pondering these things when I heard loud laughter from the library and on returning found the logs again blazing in the fireplace, from which the smoke rose demurely in the flue.

"This fireplace is like a geyser, Mr. Ames," said Cecilia, "and spurts smoke at regular intervals. As I remember, the clock on the stair was striking 9 last night when the smoke poured out, and there—it is striking 9 now!"

She tossed her head slightly, and this was, I thought, in disdain of the suspicion that must still have shown itself a little stubbornly in my face.

I withdrew again in a few minutes and followed the great chimney's course upward. Miss Octavia's apartments were at the front of the house, her sitting room windows looking out upon the Italian garden. Her doors were closed, but I knew from my examination in the morning that the fire of her fireplace tapped the chimney that rose from the drawing room and had nothing whatever to do with the library chimney.

From the fourth floor I gained the roof by the route followed on my inspection of the house in the morning. The smoke from the library chimney was rising in the air, with a little

have given me information, nes. I did not know that Heze-

prayed by Miss Octavia and again by Wiggins. A long telegram from my assistant that reached me while I dressed for dinner had urged my immediate attendance upon my office. Some of my best clients, now reopening their houses for the winter, were in desperate straits. But, Octavia Hollisters do not occur in the life of every young man, and both Cecilia and Hezekiah had taken strong hold upon my imagination. Wiggins' place among the dramatis personae would in itself have compelled my sympathetic attention, and the nine silk hats that I had seen bobbing over the stile still danced before my eyes.

"Miss Hollister," I said, "my time is yours to command. My office is well organized, and I am sure that my assistant is equal to any demands that may be made upon him. Pray state in what manner I may serve you."

"I am going far, I know, Mr. Ames, but I beg that you will not be in haste to leave my aunt's house. She must have been strongly prejudiced in your favor or she would not have asked you here on so short acquaintance. I am confident that she has no thought of your leaving. She expressed her great liking for you at luncheon, and I am sure that she will see to it that you do not lack for entertainment. I assume that you must have gathered from what Mr. Wiggins told you of my acquaintance with him the peculiar plight in which I am placed."

I bowed. If she groped in the dark and needed my help in finding the light, I was not the man to desert her. I had dropped my plumb line into too many dark chimneys not to feel the fascination of mystery. As I expressed again my entire willingness to abide at Hopewell Manor as long as she wished, the footman announced Mr. Hartley Wiggins.

We had hardly exchanged greetings before another man was announced, and then another. I should say that it was at intervals of about three minutes that the sedate servant appeared in the curtained doorway and announced a caller until nine had been admitted. My spirits soared high as the gentlemen from the Prescott Arms appeared one after the other. The earlier arrivals rose to greet the later ones, and as they were all in evening clothes I experienced, as when I had seen the same gentlemen in their afternoon raiment crossing the stile, a sense of something fantastic and eerie in them. In the interest of brevity and to avoid confusion, I tabulate them here with a notation as to their residence and occupation, taking such data from the notebook in which, at subsequent dates, I set down the facts which are the basis of this chronicle.

Hartley Wiggins, lawyer and farmer. Hare and Tortoise club, New York. Linnaeus B. Henderson, planter, Roanoke, Va.

Cecil Hugh, Lord Arrowood, no occupation, Arrowood, Hants, England.

Daniel P. Ormsby, manufacturer of knit goods, Utica, N. Y.

S. Forrest Hume, lecturer on Scandinavian literature, Occidental university, Long Trail, Okla.

John Stewart Dick, pragmatist, Omaha, Neb.

Pendennis J. Arbuthnot, banker and horseman, Lexington, Ky.

Percival B. Shallenberger, novelist and small fruits, Sycamore, Ind.

George W. Gorse, capitalist, Redlands, Cal.

newaltitudes as I watched her. If this strange wooing was not to her liking she certainly made the best of it. She capped Henderson's best story with a better one in negro dialect, and no professional entertainer could have improved upon her recital. As she finished we all joined in the general laugh, Lord Arrowood's guttaw booming out a trifle boisterously, when Miss Octavia quietly rose and excused herself. About five minutes later, when the company had plunged into another series of anecdotes, I suddenly became conscious that the fireplace, near which I sat, had all at once begun to act strangely. Much in the manner of its performance the previous night, it abruptly gasped and choked, the smoke ballooned in a great swirl and then poured out into the room.

After my examination of the flues in the morning I had dismissed them from my mind, and this extraordinary behavior of the library fireplace astounded me. It is not in reason that a perfectly normal fireplace, built in the most approved fashion and with chimneys that rise into as clear an ether as October can bestow could act so monstrously without the intervention of some malign agency. We had discussed all the possibilities the previous night, and I was not anxious to hear further lay opinions. The chimney's conduct was annoying, the more so that to my professional sense it was inexplicable.

of her fireplace tapped the chimney that rose from the drawing room and had nothing whatever to do with the library chimney.

From the fourth floor I gained the roof by the route followed on my inspection of the house in the morning. The smoke from the library chimney was rising in the crisp, still air blithely. I leaned upon the crenelations and looked off across the hills, enjoying the loveliness of the sky, in which the planets throbbed superbly. There was nothing to be learned here, and I crept back to the trap door through which I had come, made it fast and continued on down to the library.

There somewhat to my surprise I found that in my absence all but Hume had taken their departure. As I paused unseen in the doorway I caught words that were clearly not intended for my ear.

Cecilia sat by the long table near the fireplace. Hume stood before her, his arms folded.

"You are kind. You do me great honor, Professor Hume, but under no circumstances can I become your wife."

I retreated hastily to the billiard room, where I took a cue from the rack and amused myself for perhaps fifteen minutes, when, hearing the outer door close and knowing that Hume had departed with his congee, I returned to the library.

## TREATMENT FOR SCOURS IN HORSES

Sometimes scouring seems to be the result in young horses of too severe use at either road or draft work, says David Buffum in Farm and Fireside. At other times it appears to be a constitutional weakness, always exhibited when the horse is called upon for anything out of the ordinary. "Cut feed"—that is, hay or straw run through a cutting machine, wet up a little and mixed with meal—will sometimes cause it. The horse should have a reasonable amount of good, sweet hay, fed entirely dry, and his proper ration of grain. Last year I cured a very bad case by simply giving the horse three months' run in good pasture, then feeding as above and using rather moderately for a couple of months. This is what I would advise.

If his feed, however, is what it ought to be it might be well to try the following treatment: First give fifteen or twenty drops of tincture of aconite root in water. The following day give

In the Shire we have the result of many generations (over 200 years) of patient perseverance of the most scientific breeders in the world on a fixed line of breeding for the specific purpose of producing a model draft horse. As evidence of success their horses have been long in demand in all civilized countries where improvement in horse breeding is carried on. Having been bred so long for this purpose, their special characteristics have become fixed and are transmitted uniformly to their progeny when mated with any other class or breed. The Shire stallion shown was champion at the Chicago International in 1912.

a powder compounded as follows: Prepared chalk, five drams; pulverized catechu, one dram; pulverized opium, ten grains; mix thoroughly. Give three of these powders a day, then skip one and give three more. Be sure during the treatment that the horse has plenty of water. I cannot promise that this treatment (which is the treatment for acute diarrhea) will effect a cure, but it is worth trying. The best road to a cure, I think, lies in giving the colt a good run at grass and afterward being very careful about his diet, feeding nothing that might irritate the stomach or bowels and using moderately until he seems better.

## BREEDING HOG RATIONS.

Animals Should Be Fed For Bone and Muscle Rather Than Fat.

## THE SWINEHERD.

Pigs that have become too fat by overfeeding and lack of exercise should not be chosen for breeders.

Sows kept for breeders should be given lots of exercise.

When the hogs come up to the trough to eat look them over for graybacks. If you find them, thin some kerosene with water and rub it along their backs.

There's money in hogs, but it requires industry and gumption to get it out. But, then, this is true of all business.

The returns from swine are big if the management is good.

Hogs use much food that would otherwise go to waste. Think that over.

The bacon types of hogs furnish the largest litters and make pork that brings the highest prices.

## CONCRETE FLOORS.

More Economical and Efficient Than Wood or Earth.

One of the most successful farmers in Illinois says of his concrete feeding floor, "It pays for itself every two weeks." An Ohio state experiment station bulletin shows by chemical analysis that manure produced by steers fed on cement floors is worth more per ton than that taken from earthen floors. Besides, under ordinary conditions a four inch concrete floor will cost less than an oak floor, writes M. N. Goodnow in Farm and Fireside.

Concrete floors for feeding pens, stables, hog houses, poultry houses, milk houses and dairies can be laid much as if they were sidewalks. An important feature is proper drainage, obtained both by having a dry base upon which to place the concrete and by sloping the floor toward a suitable point one-fourth inch to the foot.

A wise precaution is to excavate to a depth of a foot for the drainage foundation and around the outside edges of the floor dig a trench about one foot wide and eighteen inches deep. By filling up this trench with concrete rats cannot burrow underneath and nest. Fill the excavation inside the trench with well tamped coarse gravel, crushed rock or broken tiles.

In stables, cow barns or where animals of considerable weight are to stand the concrete floor should be at least six inches thick. Feedway floors may be four inches. Stalls and drive-ways should be six inches.

As a general proposition, a mix of one sack of cement to two and one-half cubic feet of screened gravel or crushed stone will answer the purpose. The mixture should be wet enough to show moisture on its surface and should never be allowed to stand longer than half an hour.

A gutter form should be constructed so that it can be placed in position while the floor is being poured. Four by six inches is a good size for the gutter, which should connect with the manure pit by means of a trough or sewer.

Finish the surface of the floor three-fourths inch thick with a mixture of sand and cement. Use a wooden trowel and mark spaces with a straight

## FEEDING THE COLT AT WEANING TIME

The profitable draft horse is grown from a foal that has been kept growing from start to finish and matured with strong sinew and muscle, writes G. W. Brown in the National Stockman. Such an animal is of value, and the few pounds that are placed upon a matured animal, with size, proper shape and good weight, are worth dollars to the owner. This cannot be accomplished with an animal that has been allowed to go bad at the crucial point in its life—weaning.

The best horse is grown from a dam that is bred only every other season, and there are good reasons set forth. The dam is not only much easier kept in condition, but the foal may be grown up from infancy much stronger and is better prepared to meet the weaning period. Then it is not necessary to wean the young colt at so early a period in order to avoid danger in robbing the strength of the dam and her fetus. This is very important to the weanling, as it may stay at the side of the dam a much longer time. If supplemental foods, such as bran, middlings, gluten feed, chopped oats and corn, have been introduced in a proper ration previous to weaning time this period is easily tided over in the

Photo by New York Agricultural college.

By many the Percheron is considered the ideal draft horse. In the best individuals the limbs are well set on, muscular and with prominent joints, shoulder long and sloping, thighs and forearm massive, hoofs wide and conical and body cylindrical, well proportioned and neat. The color is dappled or iron gray, sometimes black or bay, but seldom chestnut. With high action, vigorous and courageous, the Percheron is a fine type for quick and heavy draft work. The stallion Jantier, here shown, is owned by New York Agricultural college.

six or eight months' colt. We favor the latter age if possible, for the stomach has more fully developed to take care of coarser, hard digestible materials, and less danger may be encountered from indigestion, worms, lice and disorders that attend an ill cared for weanling.

Weaning time of the foal upon the farm comes usually at a period of the year when little grass is attainable and when late autumn grasses are coarse and of poor nutrient value and cannot well be depended upon as feed; hence

## ENTER THE OYSTER

There's an R in the Month That For Bivalves.

For scalloped oysters prepare of oysters and season them with a teaspoonful of salt and half spoonful of pepper. Into one-half of melted butter stir a cup of crumbs. Butter a shallow dish, one-fourth of the crumbs, then the oysters, then one-fourth of the crumbs, the remaining oyster a thick layer of crumbs on top. Bake twenty minutes or until crumbs are brown and the juices bubble up on the edges. In doubt rule half as many cracker more will be sufficient.

## Cream Oysters on the Half S

Pour into a saucepan a cupful water, one of milk and one of with a little salt. Set into a hot water until it boils; then stir tablespoonfuls of butter and salt, with white pepper. Take the fire and add two heaping spoonfuls of corn starch wet with milk. By this time your shells be washed and buttered and oyster laid within each. Run shells closely together in a baking pan. Stir the cream very hot fill up each shell with a spoon, five or six minutes in a hot oven the shells become warm.

## Oysters In Cream (German Fas

Drain twenty-four oysters, a juice of a lemon, one ounce of salt and pepper and bring to Melt one ounce of butter, add to spoonfuls of flour, one-half white stock, a spoonful of mustard ketchup and cook and stir five minutes. Blend the yolks of two with one-half cupful of cream or

being very careful about his diet, feeding nothing that might irritate the stomach or bowels and using moderately until he seems better.

## BREEDING HOG RATINGS.

### Animals Should Be Fed For Bone and Muscle Rather Than Fat.

Hogs which are intended for breeding purposes, both boars and sows, must be fed for the development of the muscle, bone and constitution rather than for the production of fat, says the American Agriculturist. They should have the period of growth prolonged until they are fully developed in both body and frame. Muscle and bone building feeds are those which contain a relatively high content of protein and ash or mineral matter. They include wheat bran, shorts or middlings, skimmilk, linseed oil meal, the leguminous forage crops, such as cowpeas, soy beans, alfalfa, the clovers, velvet beans, the vetches and the packing house byproducts, such as tankage, meat meal and blood meal.

Of these high protein feeds skimmilk is one of the best and cheapest. Skimmilk, if available, should be fed to young hogs intended for breeding purposes, especially boars. The best results are secured when skimmilk is mixed with bran, shorts, cornmeal or some other feed which will thicken it. This slop should be fed sweet and be thin enough to pour readily.

In case skimmilk is not available linseed oil and packing house byproducts may be utilized, but should be fed sparingly to young breeding stock owing to the high content of protein. Linseed oil meal may supply from a fifth to a sixth of the ration, provided no other protein feeds are fed. Packing house byproducts may supply from a tenth to a twelfth of such a ration. Leguminous forage crops furnish a cheap source of protein. Besides the economy of forage crops they afford exercise for the boar while he is harvesting his own feed, and this increases his thrift and stamina.

### Bone Troubles In Horses.

One cause of spavin, ringbone and other bone troubles in horses is the lack of proper nourishment. An unbalanced ration containing a large amount of corn and deficient in ash makes a porous bone with a rather spongy texture. Fed a proper ration, the same animal would develop a much stronger bone with a firm, solid texture. The bone diseases are usually simply an effort of nature to add extra growth to re-enforce a bone that is not strong enough for its load. A great many of these troubles would be avoided if all horses, particularly when they are growing, were supplied an abundance of such feed as oats, with some of the legume hays for roughage.

### Alfalfa and Corn For Hogs.

Hogs running on alfalfa should receive grain rich in carbohydrates, for alfalfa is rich in protein. It may be said that some skimmilk or tankage may be fed to advantage, but good growth will be made by feeding at least two pounds of corn per day per 100 pounds of live weight. In other words, hogs running on alfalfa ought to get all the corn they will eat up clean, with a little skimmilk or tankage or a mixture of skimmilk and shorts, if the best and highest yields are to be obtained.

so that it can be placed in position while the floor is being poured. Four by six inches is a good size for the gutter, which should connect with the manure pit by means of a trough or sewer.

Finish the surface of the floor three-fourths inch thick with a mixture of sand and cement. Use a wooden trowel and mark spaces with a straight edge not over six feet for either dimension, as in a sidewalk. Four or five days should be devoted to curing the concrete, and it should be covered with a tarpaulin or sand or earth. Occasional drenchings will also benefit it.

## WEANING THE FOAL.

### Youngster Should Have a Supply of Feed Constantly Before Him.

It is generally recommended that the young foal be weaned at the age of five to six months. Before this time the foal should have learned to eat grain with the dam, nibbling from the mother's supply.

One of the best authorities, in Henry's "Feeds and Feeding," states as follows: "Leave the colts in their boxes, two or three together, several days and have the boxes open upon a nice grass paddock. Let them run out and in, give them oats mixed with bran and sorghum cut fine, and in a few days more turn them out in the fields away from their dams, where there are plenty of grass and water and a large trough with feed in it constantly. They have been in the habit of taking their milk a great many times a day, and they need food just as often. The best way is to keep plenty of mixed food for them, using cracked corn and oats; also unthrashed oats run through a cutter box, then mixed with bran and water enough to moisten it and make the bran adhere to the oats."

A fair allowance of grain under one year is from two to three pounds per day. Nothing is superior to blue grass pasture and oats.

### Starting a Sheep Flock.

For starting a small farm flock I believe that it will pay a good deal better to get pure bred ewes and a pure bred ram, says a correspondent of the American Agriculturist. There is a great deal of satisfaction in having well bred animals on the place, and they will be of more value every year. It is not necessary to pay fancy prices for animals such as are seen in the show ring, but good, registered animals are worth while. However, if I were going to buy grades I would say the very cheapest ewes I could get, but would still get a pure bred ram. A ram will very quickly build up the flock, and the quality of the ewes at first will not make very much difference after the first year or two. The cheaper ones will net a larger return on the investment.

### Horse Hints.

Carefully train the colt. Perfect mares only should be bred. If you cannot afford to buy a stallion get your neighbor to go into partnership with you.

Patronize only the best blacksmith. Your horse's feet are of the greatest importance and should be carefully watched.

It seldom pays to buy horses from "gyps." They have so many ways of fixing up an old broken down horse that it takes an expert to see which is horse and which is fake.

rials, and less danger may be encountered from indigestion, worms, lice and disorders that attend an ill cared for weanling.

Weaning time of the foal upon the farm comes usually at a period of the year when little grass is attainable and when late autumn grasses are coarse and of poor nutrient value and cannot well be depended upon as feed; hence it is best to stake dependence upon bright clean hay from the mows as roughage. If one has alfalfa hay it is fortunate. There is no better feed for the weanling colt. A balanced ration is contained therein and one easily digested.

A paddock for the weanling, with plenty of such roughage and supplied by a generous hand with chopped oats and bran, is a paradise for the weanling colt. The water supply is often neglected, and water should be supplied in generous quantities.

### Drenching a Cow.

The favorite physic drench for a cow consists of one to two pounds of epsom salts, half to two ounces of ground ginger root, a cupful of blackstrap molasses, half to one cupful of salt and three or four pints of warm water. Be careful not to mix coarsely ground ginger root, caraway seed, fennel or aniseed in a drench. The coarse particles always cause irritation and cough. The average cow takes the smaller dose above mentioned. The large dose is for a big bull or heavy cow or given in a case of great necessity or emergency, for example, when a cow has impaction of the bowels or when she has taken some poisonous matter. It should be added that costiveness does not require the use of a physic drench. This is better relieved by alteratives such as calomel, rhubarb, gamboge, etc., along with stimulants, such as nux vomica. These drugs are best prescribed by the veterinarian.—A. S. Alexander, M. D. C., in Farm Journal.

### The Kicking Cow.

If a cow that is not a chronic kicker begins to kick, find out the reason. Her udder or teats may be sore. For a chronic kicker take a strip of wood from fourteen to sixteen inches long. Cut a hole in each end. Run a strap through each hole; fasten one above the hock and the other down at the bottom of the leg. A rope tied around the body just in front of the udder will also stop some cows from kicking.

### Hogs Need Mineral Matter.

Hogs kept in confinement have a craving for mineral substances or for burned vegetable matter. It has been found good practice to supply the hogs with such matter. Charcoal is best, but a mixture largely wood ashes with a small amount of salt and sulphur may be used in lieu of the charcoal.

### Mated.

"What do you think? Mayme's affinity is a shoemaker!"

"The very man to be a sole mate."—Baltimore American.

The first test of a truly great man is his humility.—Ituskin.

**SHILOH**  
quickly stops coughs, cures colds, and heals the throat and lungs. :: 25 cents.

### Oysters in Cream (German Fash).

Drain twenty-four oysters, add juice of a lemon, one ounce of salt and pepper and bring to a boil. Melt one ounce of butter, add two spoonfuls of flour, one-half p white stock, a spoonful of mustard ketchup and cook and stir five minutes. Blend the yolks of two eggs with one-half cupful of cream or add to the sauce and pour over the oysters.

### Novelty Items.

A pretty way of offering sewing to give them in an embroidery that can be used for needlework ward. There are bags made of satin, embroidered with pink blossoms and lined with pink, would make a charming gift, or wattleau blue bag embroidered with a white lining is very pretty.

The bags have wide tops and up with a soft satin ribbon matches the lining.

The open air girl is not content to have a colored crepe de handkerchief tucked into the pocket of her knitted or fleecy coat, but she must have a bow to throat to match it exactly in color.

These sets are made in the shades of blue, mauve and canary. A dainty white handkerchief the other day had, instead of the navy hemstitched border, a tiny knot stitch design, not more than eighth of an inch in width, woven over the raw edges in vivid blue, red or green.

One of the newest forms of blouse seen on a fine lingerie blouse is barrel shape covered with white linen. It was pulled through the tonhole and allowed to hang loosely for about an inch from a of the muslin.

### Up and Down Stairs.

Do not fail to close your refrigerator door each time you use the box. Ice will last much longer and your air department will be much colder.

To make sure that there is no water in the cabbage, after removing the leaves, place it in a dish of which has been salted and add a spoonful of vinegar. This will remove the worm out.

Rice should be washed in several waters before cooking it. The best way to do this is to put the rice in a strainer and plunge it up and down in a water. Hot water is far better cold, for if the rice kernels have been coated with paraffin the hot water will wash it off. This is impossible with the cold water.

Pieces of barrel hoops from eighteen inches long are very useful for hanging freshly ironed shirt waists, little dresses on. Put one end in a hole, pass the other up over the line and put it in the other arm. This keeps them in shape while hanging, and several can be hung on a line.

### Trousers Hangers For Skirts

A woman fastidious about her tailored skirts in perfect condition says she did not find a satisfactory skirt hanger until she adopted the use of trousers hangers. She folds the skirt over double at the belt and fastens the trousers hanger over the folds. This keeps the hanger from wearing the skirt. It presses over the folds and keeps the hanger from wearing the skirt. It presses over the folds and keeps the hanger from wearing the skirt. It presses over the folds and keeps the hanger from wearing the skirt.

## Above Piano for \$219.00

—4 ft. 9 in. high; 5 ft. 4 in. long; 18 inches wide. Brand new. Made by a responsible firm and needed. If you are thinking of getting a piano it will pay you to see

one moved to Napanee we have a fine Piano Show Room at residence, first corner north of Hotel, and first corner east of Office, where we have several of Pianos.

any day or evening. We also sell Organs, Sewing Machines, Phonographs, Gramophones, Stools, and Drapes. Solicited.

Large Farms for sale.

VANLUVEN BROS.,  
Napanee and Moscow.

## ENTER THE OYSTER.

It's an R in the Month That's Good For Bivalves.

Scalloped oysters prepare a pint of water and season them with half a spoonful of salt and half a saltful of pepper. Into one-third cup melted butter stir a cup of cracker crumbs. Butter a shallow dish, put in a layer of the crumbs, then half of oysters, then one-fourth more of crumbs, the remaining oysters and a layer of crumbs on the top. Bake twenty minutes or until the oysters are brown and the juice bubbles on the edges. In doubling the recipe use half as many cracker crumbs and the butter will be sufficient.

### Ham Oysters on the Half Shell.

Melt into a saucepan a cupful of butter, one of milk and one of cream, a little salt. Set into a kettle of water until it boils; then stir in two spoonfuls of butter and a little with white pepper. Take from the fire and add two heaping tablespoonfuls of corn starch wet with cold water.

By this time your shells should be washed and buttered and a fine layer laid within each. Range the shells closely together in a large baking pan. Stir the cream very hard and brush each shell with a spoon. Bake six minutes in a hot oven after which the shells become warm.

### Oysters in Cream (German Fashion).

In twenty-four oysters, add the juice of a lemon, one ounce of butter, and pepper and bring to a boil. Add one ounce of butter, add two teaspoonfuls of flour, one-half pint of cream, a spoonful of mushroom ketchup and cook and stir five minutes. Blend the yolks of two eggs with one-half cupful of cream or milk.

## FOR YOUNG FOLKS

About the Schoolboy Farmers of New York City.

### A YOUNG AGRICULTURIST.

An Amusing Game For Little People. Instructive Bits of Useful Information—How to Play Shepherd and Wolf—A Scout Mascot.

Since the policy of instructing the school children in the art of farming became established in New York city some of the youngsters who ordinarily spent their vacations in play have become quite skillful agriculturists. Of course only a few of the vast army of scholars took up the idea, but those who did have profited morally

© by American Press Association.

### A FARMER AT HARVEST TIME.

and, in a small way, financially. In some of the schoolyards plots were set aside for cultivation, but most of the farming is done in vacant lots, the use of which was given by the owners. Some of the youngsters have raised vegetables enough to be of real help to their families, and the lesson of thrift taught and the pleasure of performing useful labor have been of lasting benefit to the young tillers. The picture shows one of these young farmers who have raised crops. His joy in the harvest is depicted in his smiling face. He has learned a lesson in industry that will doubtless be of great benefit in shaping his character.

### Shepherd and Wolf.

A good out of door game is called "the shepherd and the wolf." To play this the children stand in a long line,

## FOR THE AUTO VISITOR.

Cinnamon Toast a Dainty That is Easily Prepared.

It is the frequent experience of the cottager in the suburbs in these days to receive visits unexpectedly from friends who are touring in automobiles, and she finds that she must have something delectable for afternoon tea always on hand. First among dainties easily prepared is cinnamon toast.

Use a cookie cutter of fancy shape and cut thin slices of white bread, spread with butter, then sprinkle thickly with powdered cinnamon and sugar on one side. Put the buttered sides together, sandwich fashion, and toast. This leaves the exposed toasted sides absolutely dry, and the sandwich can thus be eaten without the use of a fork.

Another dainty in the way of a sandwich is called dream cake. This is prepared in the same way except that instead of the cinnamon and sugar a slice of dairy cheese is used as a filling, while a dash of paprika, a little salt and a bit of mustard, if desired, are added.

The combination of Boston brown bread and white bread spread with cream cheese proves also palatable to many and cut in fancy shapes is attractive as well. Chopped nuts may be mixed with the cheese when desired.

Tomato sandwiches are another appetizing adjunct to the afternoon tea table. Cut slices of white bread, but do not butter them. Cut very thin slices of tomato, being careful to choose those not too ripe; add mayonnaise or, if preferred, French dressing.

A combination of tomato, cucumber, lettuce and green peppers, all chopped very fine and made into a paste by adding cream cheese, a little oil and vinegar, pepper and salt and put between slices of graham bread, is also a delicious sandwich.

If one has soft finger rolls ready an extremely pretty way to prepare them is to cut the rolls lengthwise and fill with watercress, well salted. No oil or vinegar is used in this case.

### Kitchen Chat.

A preserve for which our English cousins are rightly famous is a combination of greenages and damsons. First of all, a sirup should be made of five cups of sugar, the juice of six very sweet oranges, one-half pint each of brown brandy and port wine. Cover and let simmer for an hour. Allow it to come to a boil then add two quarts of greenages and one of damsons—the stones having been removed. One teacupful of their kernels, however, is to be added. Again the pan must be covered and the contents allowed to simmer for an hour. Remove from the fire and leave jam to stand over night in the same pan. On the following day bottle the mixture and seal. This is warranted to keep for months if properly sealed. It also makes a good tart filling.

### An Easy to Copy Style.

This delicious little frock is of Chinese crape in pervenche blue, with a peg top skirt divided to form a slightly slashed effect at the bottom of the skirt, which, by the way, has an inset of plaited chiffon.

A pointed vest is used on the bodice of the crape crossed over a chemisette

## STRONGLY ADVISES "FRUIT-A-TIVES"

Because They Cured Him, And They Will Cure You

MR. ALEX. MCCARTER

WALKERTON, ONT., May 9th, 1911. "I have been in Walkerton in business for a good many years and many of my townsmen know that my health, for long periods was precarious. My trouble was extreme Nervousness, brought on by Indigestion and Dyspepsia, from which I suffered in the most severe form. It was so bad that I could not sleep before about four in the morning. I noticed one of your published testimonials of how someone had used "Fruit-a-tives" for similar trouble and asked Mr. Hunter, my druggist, his opinion on the matter and he advised their use. I immediately procured several boxes and I am pleased to say that I now enjoy splendid health and could not possibly feel better. I can eat with every degree of satisfaction and sleep without an effort. I strongly advise anyone suffering from like complaints, to commence using "Fruit-a-tives". ALEX. MCCARTER. 50c. a box, 6 for \$2.50—trial size, 25c. At dealers or from Fruit-a-tives Limited, Ottawa.

### To Insure Success In Preserving Fruit.

Success in preserving, as in other branches of the culinary art, depends largely on a strict adherence to rules.

For instance, it is well to avoid tin or metal utensils, as fruit acids attack metals and occasion a disagreeable and unwholesome flavor, and a dull off color is frequently the finished product. White lined utensils are preferable.

The shape of the pans may seem an unimportant matter, but it is well to bear in mind that broad rather than deep pans are advantageous, since the weight of fruit is apt to crush that below.

It is a vast help to have the necessary utensils, which include scales, measuring cups, jelly bag, wooden spoons, a wooden pestle, a colander of agate or similar ware, earthen bowls, a large mouthed funnel, silver plated knives and forks, a skimmer, a ladle, a pitcher with long, narrow pointed lip, a new sieve and two or three pans.

Fruit for preserving in any form should be fresh picked or gathered and slightly underripe. Such fruit insures more perfect shape in the finished product and eliminates the possibility of fermented fruit or the loss of pectin or jelly making property. Handle soft fruit (peaches, berries,

Cream (German Fashion).  
 In twenty-four oysters, add the  
 e of a lemon, one ounce of butter,  
 and pepper and bring to a boil.  
 t one ounce of butter, add two tea-  
 spoonfuls of flour, one-half pint of  
 te stock, a spoonful of mushroom  
 hup and cook and stir five min-  
 utes. Blend the yolks of two eggs  
 i one-half cupful of cream or milk,  
 to the sauce and pour over the oys-

#### Novelty Items.

A pretty way of offering sweets is  
 five them in an embroidered bag  
 can be used for needlework after-  
 1. There are bags made of white  
 i, embroidered with pink cherry  
 sons and lined with pink, which  
 ld make a charming gift, or a pale  
 eau blue bag embroidered in pink  
 a white lining is very pretty.  
 e bags have wide tops and draw  
 with a soft satin ribbon which  
 es the lining.  
 e open air girl is not content mere-  
 o have a colored crepe de chine  
 lkerchief tucked into the breast  
 et of her knitted or fleecy golf  
 but she must have a bow at her  
 at to match it exactly in color.  
 ese sets are made in the prettiest  
 es of blue, mauve and canary.  
 e dainty white handkerchief seen  
 other day had, instead of the ordi-  
 hemstitched border, a tiny blan-  
 stitch design, not more than an  
 h of an inch in width, worked  
 the raw edges in vivid color-  
 red or green.  
 e of the newest forms of buttons  
 on a fine lingerie blouse was a  
 el shape covered with white mus-  
 It was pulled through the but-  
 ole and allowed to hang down  
 ly for about an inch from a twist  
 e muslin.

#### Up and Down Stairs.

not fail to close your refrigerator  
 each time you use the box. Your  
 ill last much longer and your cold  
 epartment will be much colder.  
 make sure that there is no worm  
 e cabbage, after removing the out-  
 aves, place it in a dish of water  
 h has been salted and add a tea-  
 spoonful of vinegar. This sends  
 worm out.  
 e should be washed in several wa-  
 e before cooking it. The best way  
 this is to put the rice in a sieve  
 plunged it up and down in a pan of  
 r. Hot water is far better than  
 for if the rice kernels have been  
 d with paraffin the hot water  
 wash it off. This is impossible  
 the cold water.  
 ces of barrel hoops from ten to  
 een inches long are very useful to  
 freshly ironed shirt waists and  
 dresses on. Put one end in the  
 ole, pass the other up over the  
 and put it in the other armhole.  
 keeps them in shape while dry-  
 and several can be hung on a few  
 s of line.

#### Trousers Hangers For Skirts.

A woman fastidious about keeping  
 alored skirts in perfect condition  
 she did not find a satisfactory  
 hanger until she adopted the use  
 users hangers. She folds the skirt  
 double at the belt and fastens the  
 ers hanger over the folds. To  
 the hanger from wearing the ma-  
 it presses over she sews a cover-  
 of unbleached muslin over the  
 ps.

and caused crops. His joy in the har-  
 vest is depicted in his smiling face.  
 He has learned a lesson in industry  
 that will doubtless be of great benefit  
 in shaping his character.

#### Shepherd and Wolf.

A good out of door game is called  
 "the shepherd and the wolf." To play  
 this the children stand in a long line,  
 one behind the other, holding each other's  
 dresses. The one at the head of the  
 line represents the shepherd and the  
 little children are the lambs. One  
 player stands apart from them, and he  
 is the wolf. He sneaks stealthily round  
 the place, and the leader or shepherd  
 calls out, "Who goes round my house  
 this dark night?"

The other answers, "I am the wolf."

The shepherd says, "I beg you not to  
 hunt my lambs."

The wolf then says, "I only want one,  
 and this cute one I will have." As he  
 talks he jumps at the last player in  
 line. The shepherd swings around to  
 save his pet lamb, followed, of course,  
 by the others. The wolf is sly and pre-  
 tends to turn aside, only watching  
 his opportunity to pounce. When he  
 catches the lamb the lamb must try to  
 slip away, and if she succeeds she, in  
 turn, becomes shepherd. The wolf  
 must then pay a forfeit and relinquish  
 his place to the lamb in line, taking his  
 place.

#### An Amusing Game.

Try playing the game of the four  
 elements next time things become dull  
 at a party.

The players are seated in a circle;  
 the one who has been selected to be-  
 gin the game takes a knotted hand-  
 kerchief and throws it suddenly into  
 another's lap calling out at the same  
 time either "earth," "air," "fire" or  
 "water." If "earth" is called out the  
 player into whose lap the handker-  
 chief has fallen must name some  
 quadruped before the other can count  
 ten; if "water," he must name a fish;  
 if "air," a bird; if "fire," he must re-  
 main silent. Should the player name  
 a wrong animal or speak when he  
 ought to remain silent, he must pay a  
 forfeit and take a turn at throwing  
 the handkerchief; but should he per-  
 form his task properly, he must throw  
 the handkerchief back to the first play-  
 er. Those who have never joined in  
 this game can have no idea of the  
 absurd errors into which the different  
 players fall when summoned unawares  
 to name a particular kind of animal.

#### The Boy Scouts' Mascot.

The members of a troop of boy  
 scouts under Bernie Regula, in Oco-  
 nomowoc, Wis., had a lot of sport re-  
 cently, when they captured a live rac-  
 coon. They found the little animal  
 asleep in a tree near a lake. They  
 cut off a limb of the tree and lassoed  
 the raccoon. They are going to make  
 him their mascot.

#### Newest Wallpapers.

Everything in the newest wall pa-  
 pers runs to neutral tints and soft  
 tones. Lavender tints are growing in  
 favor and are used in drawing rooms  
 where once old rose was a favorite.  
 Much care is needed in the selection  
 of the tints, but combined with the  
 right tone of wall it is most attractive.  
 It is also an excellent color for bed-  
 rooms combined with yellow tones or  
 pure white walls. The plain silk fiber  
 for walls and the English specially de-  
 signed cretonne make the ideal living  
 rooms.

This delicious little frock is of Chi-  
 nese crape in pervenche blue, with  
 a peg top skirt divided to form a  
 slightly slashed effect at the bottom of  
 the skirt, which, by the way, has an  
 inset of plaited chiffon.

A pointed vest is used on the bodice  
 of the crape crossed over a chemisette

THE PEG TOP SKIRT.

of net and lace frills. An embroidered  
 silk girdle adds a bright note to the  
 costume. Such a frock is easy to copy  
 by the amateur dressmaker and one  
 that lends itself to the remodeling of  
 an old gown.

#### Honest Child.

"Since you worked your examples so  
 nicely," said the pretty teacher, "I  
 shall give you a kiss."

"Teacher, I didn't know there was to  
 be a reward," responded the honest  
 urchin. "It's only fair to tell you that  
 my big brother did them sums."—Pitts-  
 burgh Post.

#### Took Her Time.

"Thought you were going away to-  
 day."

"Couldn't buy a ticket."

"Nonsense. The ticket office is nev-  
 er closed."

"No; but there was a girl at the win-  
 dow ahead of me."—Washington Her-  
 ald.

#### Has a Great Field.

Higgins—Our old classmate, Whiz-  
 wire—how is he getting along in litera-  
 ture? He should be doing pretty well.  
 He had so lively an imagination. Wig-  
 gins—Oh, he's doing splendidly now.  
 He's specializing in excuses for mar-  
 ried men.—Chicago News.

The true way to conquer circum-  
 stances is to be a greater circumstance  
 yourself.—Old Saying.

a pitcher, a new sieve and two or three pans.

Fruit for preserving in any form  
 should be fresh picked or gathered and  
 slightly underripe. Such fruit insures  
 more perfect shape in the finished  
 product and eliminates the possibility  
 of fermented fruit or the loss of pectin  
 or jelly making property.

Handle soft fruit (peaches, berries,  
 etc.) as little as possible. If it is to  
 be canned in jars put it into the jars at  
 once on hulling or otherwise prepar-  
 ing it.

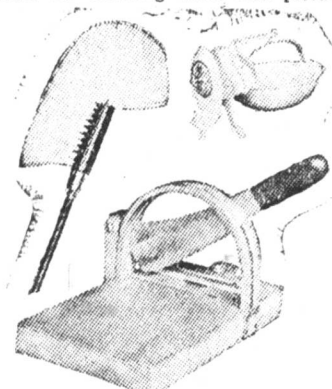

If berries must be washed put them  
 a few at a time into a colander, pour  
 cold water over them and turn at once  
 upon a large sieve to drain, then hull.

Large hard fruit, as apples, pears  
 and quinces, should be washed and  
 wiped dry before paring.

Cut apples and other hard fruit for  
 jelly into quarters, removing all wormy  
 places or imperfections. Retain the  
 skin and cores. The cores of quinces  
 should be discarded, as the excess of  
 gummy properties does not improve  
 jelly.

#### To Make Work Light.

To lighten the work of the busy  
 housewife come this long handled  
 brush for cleaning walls and picture

SOME OF THE NEWEST HOUSEHOLD HELPS.

moldings, scales that hold a meas-  
 ure for flour and sugar and a chop-  
 per that makes quick work of bread  
 and meat slicing.

#### Spiced Grapes.

Remove the skins from grapes, put  
 the pulp over the fire and stew gently  
 until it can be rubbed through a  
 coarse strainer that will not allow the  
 seeds to pass. Weigh the pulp and to  
 every five pounds of this add a pint  
 of cider vinegar, four pounds of brown  
 sugar, three tablespoonfuls of ground  
 cinnamon and two of ground cloves.  
 Stew all together until very thick.  
 Pour into jelly glasses and cover with  
 closely fitting tops.

#### Kitchen Help.

"What Do We Require Today?" is  
 a help to the cook or the housekeeper.  
 It is a new sort of ordering board. On  
 each side the usual list of groceries is  
 written. There is a central panel made  
 up of little crosswise wires, each con-  
 taining two coral colored beads. These  
 beads are pushed to the right or the  
 left, to stand next to the supplies want-  
 ed. The boards are priced at \$1.

#### Electric Restorer for Men

Phosphonal restores every nerve in the body  
 to its proper tension; restores  
 vim and vitality. Premature decay and all sexual  
 weakness averted at once. Phosphonal will  
 make you a new man. Price \$3 a box, or two for  
 \$5. Mailed to any address. The Scobell Drug  
 Co., St. Catharines, Ont.  
 Or at Hooper's Drug Store.

## ROYAL HOTEL BARBER SHOP

HARRY SCOTT, Proprietor.

Everything Neat and Sanitary.  
Best of Service Guaranteed.

GIVE US A CALL,

The Schooner Jamieson, Capt. McCullough, is reported on shore near Thompson's point. Tugs have been sent to pull her off.

The Graham Co., will open their Trenton store on Saturday Mr. Lake of the Napanee store, will take charge of the Trenton store.

You remember that good stove-pipe enamel that did not smell or burn off. We have the same thing this year, made by the Sherwin-Williams Co., at Hooper's—Napanee's Largest Drug Store.

The Inspector of High Schools has recommended the addition of another teacher to the staff of the Collegiate Institute. The large attendance of pupils renders this necessary. The Assembly Hall is being fitted up as a class room for commercial subjects.

Mr. Decatur, the gentleman who has been negotiating with the town to bring his Cultery factory from Montreal, met the members of the town council on Monday evening. Mr. Decatur asked altogether more than the town was willing to grant and a motion was passed refusing his offer.

A. S. Kimmerly will sell 23 lbs. yellow sugar or 21 lbs. best granulated sugar for \$1.00; 9 lbs. Rolled Oats, 25c. Try us for binder twine. Special prices on sugars in 100 lb. bags. Shorts and Bran always on hand. Try our 25c Tea. Berry boxes cheap. Burdock Blood Bitters, 75c bottle; Carter's Little Liver Pills, 15c.

While no alteration has been made in the personnel of the Directorate of Woods-Norris, Limited, the firm name on and after November 5th will be changed from the above to Norris-Patterson, Limited, Advertising Agency, Mail Building, Toronto. Advertisers and the Press generally will kindly note this change.

Mrs. Harshaw, Mrs. W. G. Wilson

## GRACE METHODIST CHURCH

J. P. Wilson, B. A., Pastor.

Sunday November 16th.

Classes meet 9.30, 11.30 and 6.15 p. m.

Sunday School—11.45.

Public service—10.30.

Rev. Dr. Endicott, General Superintendent of Missions of the Methodist church will preach in the morning. Rev. A. R. Sanderson, of Belleville, will preach at the evening service.

League meeting, Monday evening at 8 o'clock.

Prayer meeting Wednesday evening at 8 o'clock.

Full choir. All welcome.

## EVENING RECITAL

Reserve the evening of December 8th, for supper in Grace church. Sec.

Lamps—if you need a nice stand lamp or extra lamp globe, we can give you bargains clearing out at BOYLE & SON.

An evening recital will be given by Miss Luella E. Hall and her pupils in the Town Hall, Wednesday, November 26th. Admission 25 cents.

Remember the I. O. D. E. Bridge, Euchre and Dance to-night in the Odd-fellow's Hall for the benefit of the Mowat Consumptive Hospital.

A telegram from Edmonton announces the death in that city of Mr. Edward Wilson, a former employee of Mr. M. S. Madole. He was accidentally shot.

Charlie Lee has sold his laundry on Dundas street to the Lee Brader Co. All persons owing laundry bills will please settle at once, as Charlie Lee leaves town in a few days.

G. A. Black & Co., the new merchants at Enterprise, are adding thousands of dollars worth of new goods to the Walker Stock and will sacrifice the entire stock at very low prices, preparatory to extensive alterations to the store premises.

J. S. Cartwright, master in chamber at Osgoode Hall since 1903, died at his home in Toronto on Wednesday morning. Mr. Cartwright was a brother of the Deputy Attorney General, John R. Cartwright, K. C., and was a cousin of the late Sir Richard Cartwright.

Why send away for trusses when we can give you a perfect fit on any style you want at a much lower price and guarantee you satisfaction or money refunded. See our new style of truss that can be bent to suit any form of rupture. Wallace's, Napanee's leading Drug Store.

## TOWN HALL

Come to the Bridge, Euchre and Dance to-night and spend a pleasant evening and at the same time help to swell the I. O. D. E. funds, for the Mowat Tubercular Hospital, which is caring for the consumptives in all stages, and doing its best to stamp out Tuberculosis in our vicinity.

Saturday at Hopper's—2 half pound boxes McConkey's creams for 25 cents. One pound refined Borax for 9 cents.

B. N. A. Johnston & Co., high-class vaudeville and magic, at Opera House all week. Perhaps Mr. Johnston and his brother are the most popular theatrical people that come to our town. If you feel blue and wish to pass away an hour or two of solid enjoyment, go to the Opera House.

## A Splendid Range Fabrics for Fall and Winter Wear.

PAUL KILLORIN, - Proprietor.

in the personnel of the Directorate of Woods-Norris, Limited, the firm name on and after November 5th will be changed from the above to Norris-Patterson, Limited, Advertising Agency, Mail Building, Toronto. Advertisers and the Press generally will kindly note this change.

Mrs. Harshaw, Mrs. W. G. Wilson and Miss Mill attended the Bridge, Enchre and dance given last week by the Argyle Chapter, I. O. D. E., in the Armouries at Belleville, to which a special train brought about 50 Daughters of the Empire and their friends who added to the success of the evening. A number of people from Belleville and Trenton are expected at the I. O. D. E. event here to-night.

## Borax for 9 cents.

B. N. A. Johnston & Co., high-class vaudeville and magic, at Opera House all week. Perhaps Mr. Johnston and his brother are the most popular theatrical people that come to our town. If you feel blue and wish to pass away an hour or two of solid enjoyment, go to the Opera House this week. Entire change of program every night.

Ten carloads of Frontenac cattle, worth approximately \$12,000, destined for the American market, is the record shipment, from Harrowsmith by J. D. Shibley, during the past two weeks. In addition to this large shipment, numerous other consignments have gone forward from other points. The most marked increase in price is in the three-year-old class, some animals of which have been sold for as high as \$90. The ruling price for unfinished animals of this class, however, is around \$80, and at this price there is a large profit over the price two years ago. That the farmers of the country will be able to supply the demand for some time to come seems to be well established. Buyers who have been over the ground state that there are still many cattle ready for shipment, and that it will take some time yet to clean them all up.

## NOVEMBER 26TH

### Mitts and Gloves-

See our specials at 50 cents. M. S. Madole.

### Empey Hill Annual Anniversary.

Sunday and Tuesday, Nov. 16th and 18th, 1913. Rev. Wm. Lambert, President of Conference, will preach on Sunday, 16th, at 10.30 a.m., when the Sacrament of the Lord's Supper will be administered. Service also at 7 p.m. Special offering at each service. Singing by the choir. On Tuesday, 18th, November, big fowl supper from 5 to 8 p.m. After supper a high-class concert will be given by the famous Male Quartette from Belleville. H. ARMITAGE, Sec'y.

J. W. DOWN, Pastor.

### Scranton Coal.

The standard Anthracite at Gleeson's. Its the best.

### Ladies Musical Club.

The first regular meeting of the Ladies' Musical Club was held in the Town Hall on Friday afternoon, Nov. 7th, the programme being arranged by Mrs. Ward, Mrs. J. L. Boyes and Mrs. W. H. Boyle, the topic being Present-day composers. A piano number by Miss Lulu VanVlack, vocal numbers by Miss Marion Wilson, Mrs. Noel Fleming and Mrs. Franklyn Vanluven, a violin number by Miss Mary Campbell, a piano number by Mrs. Byrne Black and an excellent paper by Mrs. W. H. Milsap. All these numbers were beautifully rendered and much enjoyed by the audience. A great many ladies evinced renewed interest by joining the club this year, and a very successful season is assured for the presidents and officers, whose untiring efforts on behalf of the club, meet with the hearty response and interest of its members. The 2nd regular meeting will be held in the Town Hall, Friday afternoon, Nov. 21st, at 4 o'clock, the programme being arranged by the executive. All ladies wishing to become members are requested at 3.30 o'clock.

## Benefit at Wonderland.

Master Bruce Boyd is meeting with  
considerable success in the sale of  
tickets for his benefit performance at  
Wonderland to-night. The local  
printing offices donated him 1000  
tickets which he hopes to sell and Mr.  
Foster gives him the whole proceeds  
of the performance at Wonderland.  
Help along a good cause by purchas-  
ing tickets.

## Death of Mrs. Nelson German.

Entered into rest at her home, 64  
South Union street, Rochester, N. Y.,  
on October 27th, Mrs. Catherine Ger-  
man, widow of the late Nelson Ger-  
man, formerly of Napanee, aged sixty-  
two years. She is survived by two  
sons, Harry H. and John A. W., of  
Rochester; three daughters, Mabel G.,  
Nellie L., and Mrs. W. W. Page,  
Geneva, N. Y., and one sister, Mrs.  
George McKenzie, Kingston. The  
funeral was held on Thursday, Oct.  
30th, from her home.

## Trinity Church Notes.

Fifty new members will join the  
Church as one result of the special  
Evangelistic services. Thirty were  
received last Sunday. Another re-  
ception service will be held on the 23rd  
inst. Missionary anniversary services  
will be held next Sunday when Rev.  
Dr. Endicott, general missionary sec-  
retary and other prominent speakers  
will deliver missionary addresses. The  
reports for the past year have been  
received and will be distributed on  
Sunday morning. Let every member  
and adherent of the church be present.
